Thread: [BTC Investing/Lending](#)

Mooncake - April 21, 2017, 8:54 pm

Hey, guys. I am doing something with a local company where I lend BTC and after 48 hours I get it back at the best rate at the time (2% for example).

Has anyone ever used something similar? Can you please tell me about it?

Also, I don't interface with the lender at all, and it's instant.

I saw a guy on here doing a business where he'd take your BTC and pay you double in a week. I am wondering if he did this same method, but at a mass level.

Sounds like a ponzi scheme to me, you'll be fucked if you stay in.

so something like xcoins? lending BTC from people

Mooncake - April 21, 2017, 8:59 pm

This is a picture of the panel. These are basic rates. As I mentioned, I don't even fully understand who it's "Lent" to.
