Thread: [PortFowarding Help!!](#)

LbTwoShades - April 21, 2017, 10:31 pm

Whats up guys! Ive been trying to open some ports for a few different things and cant see to get it right.Ive tried watching videos and other such things as the portfowarding.com tut. No luck if someone could take a little time out to help a newbie fresh back on the scene i would greatly appreciate it. Thanks in advance.

Type of network, type of router, all that information would be helpful lol.

Are you sure your RAT is actively listening on the port as well?

Try this post:

Router: Actiontec PK5001A

And its not just my RAT, ive tried on canyouseeme.org and it cant see any of the ports ive opened. Ive tried everything including tech support with actiontec.

RHKD - April 22, 2017, 10:05 am

try a vpn to open ports

like:

CrypticVpn

Johnapex - April 22, 2017, 10:08 am

Add me on skype and i'll try and help u

THat should work for you, if that fails, it is very possible your ISP could be blocking your ports, of you have a software firewall or other security software still enabled blocking the communication.
