Thread: [Do i get low trust if i purchase an account upgrade with such low posts.](#)

JAS - April 22, 2017, 6:55 am

I understand how it looks very dodgy when someone with little posts has an account upgrade. When i get paid i want to upgrade my account although am scared my trust scans will then be bad?

It only looks bad if you try making shady deals. If your not doing stuff like CE or selling something you wont have a problem

Not really, the reason why people are so against newbies upgrading is because it's a sign that they had a previous account on the forum. It's against the rules to have two accounts.

Ofcourse! Trust here is made by making clean transaction with other users and then they will give you a possitive reputation about this! Then users will look over your reputation info to see if you arr trusted or not!

If you want to upgrade go for it even without upgrading people wont want to deal with you cause you are new so it doesnt really matter but make some deals and soon you will get some vouches and people wont think you are some dirty scammer scum

Your trust scan is only bad if you make it bad.

As long you follow the rules, don't make shady deals, and if you're not doing anything wrong at all after upgrading, you have nothing to worry about.

I would encourage you to upgrade, read the [Help Docs](#), and participate more on the forums. The more you are around and can help people out, the more trust you will gain.
