Thread: [Proofread Research paper](#)

Funniest - April 22, 2017, 12:31 pm

Just finished a big research paper and would like someone/ a few people to proofread it and maybe even enhance it. I've never had to write a paper of this magnitude before so I'm concerned. I don't want to post the paper here but you are welcome to post here and i will pm you, or you can PM me.

I'm in my final year of University too, I've written enough essays to take a look at this for you! ?

Unfortunately, I know nothing about cloud computing security, so it would be more checking spelling, grammar and punctuation.

Feel free to toss it my way. I won't do any major revisions but I'll mark it up a bit.
