Hey everyone, I am looking for people to send users business proposals on websites where my product can be sold. You will get \$2 a day. (everyday you message users) Or \$14 a week for taking 2-3 minutes and messaging by copy and pasting which is relatively easy and simple. 5 - 10 users. PM me if interested

50 cents a day for recruiting?

We spent \$50 a day, and we don't even really recruit atm.

You're not going to get any serious people for 50 cents a day. Quality will be low, and people will just think that YOU'RE unprofessional on top of that.

Just a heads up.

Considering you are just copy and pasting messages to 5 users a day which only takes 2 minutes, it's not hard
