Thread: [Vectorized Fox](#)

YinYang - April 24, 2017, 2:27 am

The image is taken from the thread [\[Photography\] Foxes!](#) by [DarkDelta](#)

[This](#) was the image I used

To create:

My work - Large Image [\(Click to View\)](#)

My work - Smaller Image [\(Click to View\)](#)

I'm pretty sure there are tools out there to do this, but you never get good results. This method doesn't take too long, this took just over an hour and a half. I just created simple shapes from the original image, then off-set all of the paths.

What do you think? This is my 2nd time doing something like this, I'm fond of the results.

Oracle - April 24, 2017, 8:29 am

this is actually pretty good even though its your second time. :)

Cheers for the positive words man, I'm doing some more, but I think I'm going to make the lesser quality, so the effect pops a bit more

NORDZ - April 25, 2017, 6:30 pm

Its not bad its just hard to get all the details when turning a high quality picture into vector art. But not bad man keep it up!

YinYang - April 26, 2017, 1:58 am

Thanks, I think I did it too detailed though, I wanted to effect to be seen a bit stronger

Daddy???????????? - April 26, 2017, 2:05 am

I wonder if you could do a picture of my husky :3

YinYang - April 26, 2017, 2:07 am

Omg I love huskies, PM me a picture of it and I will

I just did my girlfriends border collie, and I'm getting it printed onto a canvas like pop art

Hi Roller - April 28, 2017, 12:20 am

I like foxes I approve.

Really though good work. I'm gonna say 8.5/10.

Foxaris - April 28, 2017, 12:28 am

My name has Fox in it since 2012. Respect?

Do I earn the right to use this as my avatar? #copyrightlaws

Go for it mate! You have my permission :)

Nyxuo - April 29, 2017, 4:54 am

Live trace could've done this in seconds. Just saying. Same results if not cleaner. If you didn't use live trace already =/

YinYang - April 29, 2017, 8:24 am

I find it just doesn't give as good results, when these are done professionally they're all done by hand

OrbitalData - May 1, 2017, 3:13 am

I really dig the design, style, and color combo

igneous27 - May 1, 2017, 8:41 pm

Nice work mate :) What software did you use ?

if that's manually created it good .. but if its just generated still good tho .. maybe you should make your shapes more accurate to a fur of a fox .. But still ! Good Work mate I like it :)

And hey ! you can check my vector art too we can collab if you want :)

ThisBoss - May 2, 2017, 4:01 am

it not bad bro, I can't do like you.

_base64-- - May 2, 2017, 7:30 am

I have to say well designed.

Rangers. - May 2, 2017, 1:37 pm

Your fox looks nice <3 Good try at 2nd time :)

Cybz - May 4, 2017, 3:49 am

Its great if its your second try :D My first "low poly" was terrible also

Futurefreak - May 7, 2017, 10:49 am

Not bad man, not bad ! Keep it up
