Thread: [Lines and shapes following cursor?](#)

Dopeish - April 24, 2017, 7:30 am

Looking to add something similar to my website. Many sites used to have this. Pretty sleek.

Charger - April 24, 2017, 7:30 am

JavaScript, not PHP.

Google it and you'll find it in the top 3 results.

Dopeish - April 24, 2017, 7:32 am

I've tried finding it but i find nothing tbh

Charger - April 24, 2017, 7:35 am

"javascript mouse trail effects"

<https://codepen.io/falldowngoboone/pen/PwzPYv>
<http://www.javascriptkit.com/script/cutindex18.shtml>
http://www.javascript-fx.com/mouse_trail/index.html

First three results.

You aren't going to find exactly what you need. You need to look at how it's done and combine different snippets and ideas.

Vespei - April 24, 2017, 9:29 am

PHP Can't do this buddy. :)

Explain in detail what you need. JS will be best.

We don't read minds..Speak for yourself, I do.

OP here is what you're looking for [Ultimate Javascript Library](#)
