Thread: [noob help plz plz plz](#)

CiF - July 22, 2010, 11:56 pm

allright i need help hacking my friends shawns computer becuse he some how got on to my cp and copied a pic of my gf naked that i didnt even know was on my cp so i want too hack on to his cp and delete the photo becuse now hes threatening to post it online. He allways takes stuff too far so plz help me.?

-Paramount - July 22, 2010, 11:57 pm

You have to make a RAT server and crypt it then get him to open the file.. or download it.. there are many tutorials on this site.. use the search button.

if not eof then - July 22, 2010, 11:59 pm

screw that gimme his facebook acct url and an ip (optional), and I will see what I can do.

Phizo - July 23, 2010, 12:03 am

He obviously put a backdoor into your system. Did you open any sites he sent, or any 'pictures'? If so, he's probably got a server on you giving him full privileges to your system.

We can't really teach you to hack a computer, it's not an easy job, people live on their own assumptions which is a shame. People become blinded by their own awesomeness. Well, the awesomeness they think they have.

I'm going a bit off topic here, all I can suggest is: Send him a virus on startup since you're new to this whole hacking stuff. I can't give you much to go on here, so just send him a startup virus and crash his system so he has no choice but to format, thus deleting his files. Unless he backed up the picture on a portable device.

CiF - July 23, 2010, 12:05 am

i know how to accses everthing once ive got his ip address but i cant figure out how to get it and my gf also says shed rather me do it cuse she dont what somebody she doesnt even now to have access to it

also i think he just emailed himself it from my cp at a party i had last week

Phizo - July 23, 2010, 12:09 am

I doubt you will be able to get in. I'm not underestimating your abilities or what not, I am just saying that you shouldn't underestimate this person, never underestimate anyone actually. You just don't know what this guy is capable of. He's probably some script kiddie who thinks he's cool because he has a RAT. Or maybe he knows his shit.

So keep an eye out.

CiF - July 23, 2010, 12:10 am

and if i got access to his cp i can access his save password to his email and delete it and the pic

and he isnt the smartest or most tech person eather hes just annoying as hell

Phizo - July 23, 2010, 12:17 am

Can you tell me what a 'cp' is? Don't you mean 'PC'? Also, if he's not so smart, just phish him, it's easy.

CiF - July 23, 2010, 12:21 am

yeah its a pc ive got a habbit of doing that

and what do u mean punish him ive only got his facebook account as contact and his phone num but that wont help

Phizo - July 23, 2010, 12:24 am

Oh okay. Well, I don't see what the big problem is. I think it's horrible what your 'friend' has done to you and humiliating you this way. The only way I can help you is by saying "go to the police" you don't have any knowledge of computers by the sounds of it, and it's not like anyone can make you a master hacker in a few hours, it takes years.

This is harassment and your 'friend' can get into alot of trouble for doing this.

CiF - July 23, 2010, 12:27 am

allright i aint gonna go to the police yet but thanks anyway

Phizo - July 23, 2010, 12:34 am

I know, I didn't really assume you would either. It is a lousy suggestion, but that's all I got for a newcomer, I can't give you much to come on, sorry I can't be of much help to you.

K33D4Y - July 23, 2010, 12:35 am

UHmmm...why not just go over to his house and bash his PC.And if you got into a brawl you would have a great excuse...

this is stupid...im stupid...but it sounds like a plan to me :D

Phizo - July 23, 2010, 12:37 am

That's kind of what I was going to say at the start, but I thought that it wouldn't be a good idea to put into your head. I was going to smash his computer physically since you really can't do much. It's a good idea, if you're good at getting in and getting out stealthy.

CiF - July 23, 2010, 12:49 am

that i would enjoy so much but he used to live in my naborhood and now he moved

i know hes got an iphone is there any way i could track his location when hes at his house

actually if there is ill just steal his computer if i remember right its realy nice

hemescool - July 23, 2010, 1:23 am

Actually, yes, iPhone's have a function so that you can track the location of the where abouts of the owners iPhone is. So you might be able to track him down.

CiF - July 23, 2010, 1:57 am

cool im gonna look into iphone tracking
