Pt 1 - <https://hackforums.net/showthread.php?tid=5395509>

Made a thread 7 months ago about ETH, didn't really invest in it while it was at \$10.

Now that it's at \$50, I'll invest more into it. Let me know what you think.

CanadianBacon - April 25, 2017, 2:38 pm

i think its a good investment eth is striving currently. theres a verry low chance of a pump and dump at this point.

good investment op

occupi - April 25, 2017, 2:39 pm

Good investment but hold it. There's lots of stuff coming down the pipe built on top of ethereum and it all costs ether to move/create. The only reason I haven't minted my own token on ethereum for my friends and I is that they'd need ether to send it. So there will definitely be more and more demand for ether.

Orgy made me a lot of profit with that thread he created at end of 2016.

PoLoW - April 25, 2017, 2:50 pm

I don't have enough money to invest in eth, i got 2 coins but i need more, totally worth your investment OP.

Good luck

GloryToBe - April 25, 2017, 7:02 pm

Thanks guys, going to put in a couple more hundred.

Frukt - April 26, 2017, 9:10 am

Just dropped my money into ETH. I just doubled them from TOR, hoping to see some earnings after 1st May

Although I agree that ETH is a good investment opportunity, this post makes absolutely no sense whatsoever.

GloryToBe - April 27, 2017, 9:21 am

Just got to \$58, \$20 profit so far.

Too bad I didn't buy more ETH because it was taking me a lot of time to get BTC.

GloryToBe - April 29, 2017, 12:45 pm

It got to \$70. Invested at around \$50.

Poloniex.com

You can also convert it directly in Jaxx.

Vitriol - April 29, 2017, 11:21 pm

Should I keep my money in ETH? Do you guys think it'll go up to around 90/100\$ short/long term?
Any help appreciated very new to this stuff

W?lf - April 29, 2017, 11:23 pm

Man I really hate myself. I had invested liked \$500 at \$7 and sold it all at \$10 something. FML

Don't worry there are still plenty of opportunities ofc you lost a few in eth but look forward not backwards, only look backwards to learn from your mistakes.

Right now prices are high enough wait for a dip and get in the train.

Im personally waiting for the dip too to get in the train hopefully we can still make some good profit in the future.

don't be surprised if it hits 100\$ without a dip. ETH has the potential to take over btc by the next year, a lot hasn't even been released for the coin. The current rise is mainly due to JpMorgan signing and high interest from big profile banks and companies.

Buy now and just hold, pick a number a number to sell at like 150\$ or 200\$ and just keep till then. Of course buy more if it dips.

How much ETH are you currently holding and at what price did you get it?

GloryToBe - April 30, 2017, 10:14 am

I was thinking that when it hits \$90-100 it's going to drop a lot. Just hit \$74.

GloryToBe - May 1, 2017, 6:58 pm

Cashed out at around \$445.

Yeah, I tried to do the same thing but Shapshift wouldn't work.

I'd be patient and you'll probably get it.

Ah right. I created a support ticket anyway.

I changed my mind after and was going to invest it in to STRAT but now it's over 1\$.

ItzClydeFrog - May 3, 2017, 7:27 am

When you guys say "cashed out", you mean you just traded it to BTC or sold it to coinbase or what? Sorry for the ignorance.

Lexxi - May 3, 2017, 7:29 am

Exchange it/ sell it back into BTC, then you can do what you want with your btc from there on.

when you buy a coin, you use btc, when you sell a coin, you get BTC. So we say cashed out, (sold the coin back for btc)

hope that helps, if you need more indepth, let me know, glad to help!

Yes, it's going to slowly rise over a few days back to \$85-90.

Funny reading "7 ETH worth \$550" in your signature. I've kinda lost perspective of how big ETH has gotten lately (last few months). I still remember having like 50 ETH worth \$100 total.
