Thread: [1080p or 4K Projector Deals?](#)

Any recommendations for projectors with good deals?

I think you need to do some research on your own first. 4k projectors are thousands of dollars and you shouldn't be concerned by the price if you are shopping for one. You are better off buying a 75" 4k TV and calling it a day.

If you look on the app 'wish' there are loads on there for very good prices. Not the best quality but not to bad.

Yeah I know but they make browsing, purchasing and shipping a bit easier which is worth the couple extra dollars/pounds

If you're looking for something dirt cheap you could try this out (\$70):

Or you could try something like this which is more expensive (\$280):

Or this (\$3,900): <https://www.newegg.com/Product/Product.aspx?Item=9SIA6P65BZ9171>

Or this (\$8,000): <https://www.newegg.com/Product/Product.aspx?Item=9SIA2GA3SN9869>
