Thread: [Purchasing Bots - Spreading Botnet](#)

Koaccess - April 26, 2017, 4:43 am

I recently finished my HTTP Botnet on a webhost, it is running fine and have gotten a few zombies.

I am wondering if I can purchase some zombies from a site, for a cheap price and if I do how would I run the builder (.exe) file on that computer for it to add the zombie to my botnet.

If there is no place to buy bots, what would be the easiest and most effective method of getting new computers.

Thanks in advance,
Koaccess.

I'm not sure if bot selling is allowed on this forum anymore all BH activity + Grey hat has been banned from this site.

Defo there are a couple seller on the web just look for some botshops.

CanadianBacon - April 26, 2017, 4:46 am

There are quite a few sellers on hackforums that would love to sell you their bots. just look under the Botnets, IRC Bots, and Zombies section most pinned threads are sellers.

3 out of the 4 pinned threads on botnet section is all just sellers who want to sell bots.
i dont think its banned or they wouldn't be selling

These are the guys with pinned threads selling bots:

Pink Panther

<https://hackforums.net/showthread.php?tid=5152332>

Odin

<https://hackforums.net/showthread.php?tid=4476742>

Kubuntu_ru

<https://hackforums.net/showthread.php?tid=5569520>

And there's more if you just search for bot shops or loads.

Buy bots from pink, they have the best exec rate 80-100%. Never tried Kubuntu's bots. I wouldn't recommend buying from Odin unless you want vietnam and indian bots.

Agreed. I stick to what works, and Pink works.
