What's the current wait time between searches? That's the one aspect that I dislike about leakbase.

10 Seconds to reduce botting and lighten the load on the server.

Suggestions for a better delay? Let us know and we'll take it into consideration.

Edit: It was just lowered to 7 seconds due to your post.

What about people w/ subscriptions active? Will it be renewed at the end?

People with active subscriptions are put on 'pause' and will resume once the service becomes paid again. To ease the flow we'll add a bit extra time to them.

Is the Entry Removal Service for free as well or only search service?
