Thread: [Vps host brute force allowed](#)

SKID BISCUITS - April 29, 2017, 12:50 am

Can anyone recommend a good host that won't ban me for brute force I don't want a 20 dollar server I am looking for them 100 and up servers pls and thank in advance I bein looking around and if am spend that much money I rather have some one recommended Me then rather then just reading advertisements .

Gigabot - April 29, 2017, 1:18 am

Use your home connection with max threads

Charger - April 29, 2017, 7:07 am

Get an unmanaged dedicated server.

If you get a VPS, they can see your resource usage. If you get a full unmanaged dedicated, they can't see what you are doing (except for network).

(For the most part)

DontWorryBeHappy - April 29, 2017, 9:12 pm

i know a host you can use

i use it for amp scanning and bot scanning

(Apr 30, 2017 01:48 AM)Finity Wrote: [\[CITE\]](#) Yeah dude, they TOTALLY can't see a bunch of connections to port 22 on random IPs. No way at all. Totally can't see multiple reconnection attempts. Totally.

Who knows maybe he's right.

His statement makes sense.

That's not the issue retard. The issue is the abuse reports, just shows how fucking stupid you are

I said in my post that they can see the network.

Plexle - May 1, 2017, 8:29 pm

Lol ur retarded if you think any legitimate host allows ssh brute force. Some may ignore but I'm

100% sure it's mentioned in Terms Of Service and they'll take action upon abuse report.

JK3E - May 6, 2017, 12:33 pm

gigebbox.com they will suspend you in 24 hours servers based in OVH

Key Punch - May 6, 2017, 1:26 pm

Recommendation: Hostsailor

Others: cyberbunker??

G0dzSoldiers - May 6, 2017, 6:04 pm

There is Really not much good hosting that allow "brute-forcing" they have all caught on by now.
