Alright, so here's the deal. I will tell you what I believe the method is about and you'll tell me if I am correct.

This eBook involves signing up on G2A Goldmine, build up referrals and use at least a handful of the following promotional methods:

Talk to friends

Post on social media accounts (Facebook, Tumblr, Twitter, Instagram and so on)

Spam links to various chat rooms

Contact YouTube channels and give them your referral link (LOL)

Contact CD key resellers (LOL)

Create landing pages and sites

Make blog posts

Am I right?

If you're still giving out vouch copies I'd be happy to take a copy!

Mycroft Holmes - April 29, 2017, 4:41 am

Alright, fine, since that's the way you want to play it, so be it.

Of course you deny everything I said. Admitting that, would hurt your sales and you wouldn't be able to [afford a pizza tonight](#) despite claiming that you earn [\\$400 per week easily](#), that you are knowledgeable and experienced enough to have the audacity to write a G2A Master book that includes methods I mentioned above.

After all, you were [begging to be hired by someone and listed 'SE'](#) (short for Social Engineering) as one of your key skills. And don't let me get started on [scamming for \\$12 pathetic dollars](#).

Well, I, for one, believe that you should close the thread and move on with your publicly available contents of your eBook. Maybe try to gamble. You are the luckiest person in the world, [by your own admission](#).

KingstonZ - April 29, 2017, 4:45 am

I know i've done stupid things some people here might know me I had a conversation I am trying to work my ass and refund him, I was so stupid even trying to scam, but the point is, you want to come down here and ruin it for me, your welcome I am not going to argue.

I don't have a dog in this fight. I simply warn people that your method is publicly available and you are trying to make money from false advertisement.

If you can't earn \$12 to refund someone, how on Earth do you expect someone will earn a fortune from your guide based on what is written in it, which, by your own admission again, takes someone by the hand and makes him become a master, a guru of G2A Goldmine.

Lying to more people to fix other mistakes is not the way to go.

Does this method include charging back? If so, that's probably the most public method out there and you should close the thread :)

KingstonZ - April 29, 2017, 4:51 am

Closing the thread, updating the Ebook
