Here's the source code

```
=====
pastebin.com/VtT5DA6C
=====
```

hope this was helpfull :)

btw the reason i post pastebin on this one is it needs an link to install chocolatey and i cant do that for some reason but yeah again hope it was helpfull

Did you make this? What does it do exactly?

Mr. Robot - April 30, 2017, 2:54 pm

<https://chocolatey.org/>

<https://chocolatey.org/install.ps1>

<https://www.glasswire.com/>

<https://chocolatey.org/packages/wireshark/1.8.1>

So yeah. Just installs the basics.

Code @echo off

color 0b

Mode con cols=75 lines=8

cls

title choco install

echo installing choco stuff...

@powershell -NoProfile -ExecutionPolicy Bypass -Command "iex ((New-Object System.Net.WebClient).DownloadString('https://chocolatey.org/install.ps1'))" && SET "PATH=%PATH%;%ALLUSERSPROFILE%\chocolatey\bin"

choco install wireshark

choco install glasswire

cls

echo all done!

pause>nul

exit

Lets break it down

Code @echo off

color 0b

Mode con cols=75 lines=8

cls

title choco install

echo installing choco stuff...

Hides unimportant stuff like in CMD you would normally see C:\windows\system>

Sets color of CMD to 0b (cyan writing on black background)

Changes CMD size

Clears screen

Changes the title of the CMD window to "Choco install"

Writes "Installing choco stuff..." in the window

Code @powershell -NoProfile -ExecutionPolicy Bypass -Command "iex ((New-Object System.Net.WebClient).DownloadString('https://chocolatey.org/install.ps1'))" && SET "PATH=%PATH%;%ALLUSERSPROFILE%\chocolatey\bin"

choco install wireshark

choco install glasswire

cls

echo all done!

pause>nul

exit

Runs a powershell command to download <https://chocolatey.org/install.ps1>

Which saves to your user profile in a folder called chocolatey\bin

Runs choco install - which installs wireshark, <https://www.wireshark.org/> and then glasswire <https://www.glasswire.com/>.

Cls - clears screen

Echo - says "all done!" in your window

pause>nul - waits for user input, when you press something it will continue and then run exit to exit the cmd window

Thanks, very detailed explanation.

I'm going to take a closer look once I get home. Good job mate!
