Redeem? So like a special code needed to upgrade automatically? There is a leaked plugin on NBB which does this.

That Plugin has an Issue, It only works with 1 Usergroup

So there could only be Subscription Package,

I want multiple package. Is there a Section where I could get such a plugin created for me by Paying some money ?

Contact Paradigm. on here. He created a great IPN which works perfectly with multiple upgrade groups.

People there will more than likely either offer a shitty quality plugin for free, or will charge high amounts. Best off with Paradigm. tbf, he worked on MyBB 2 as well.

Or they'll try and get you denied support and generally just be a dick to you. That forum is pretty toxic, avoid.

Yeah. They deny anyone support for pretty bullshit reasons. Most support is pretty shite there anyway.

There is easier ways to replicate it and make it have two options if you know a little PHP.
