Thread: [Just hit over 1,000 \(~\\$1289.30\): My accomplishment.](#)

Skidy - May 1, 2017, 12:44 pm

So, I started with CryptoCurrency 3 and a half weeks ago. I started small investing only £50 and ended up putting in a total of £400. Today, I checked the total values of all my coins combined and it's now worth over £1,000. That's double my investment. Furthermore, this has led to me creating a daytrading/pump bot which is still in the process.

Just wanted to thank the sub-forum for all the help getting me set up.

Leaving this here so I can check back in a month to see what I have accomplished.

Congratulations on your earnings make sure you actually withdraw amounts instead of having a "virtual profit"

L A S S 3 - May 1, 2017, 12:47 pm

Thank you, I won't withdraw any of my money for a very long time.

Going to keep adding to it. Every 2 weeks I am going to invest £5 (~\$6.45) into a new coin and see where it takes me.

Congrats, but remember that any monkey can make money in this current market. Preserve capital and make sure risk management is your key!

Yin Yang - May 1, 2017, 7:11 pm

I myself have also made a couple of grand, but I'm holding for longterm

Thats amazing bro, you've inspired me to put 20% of my wages into different coins over summer. Hopefully I see even a fraction of the success you have been having :D

If only Blockfolio would be shareable.

My bot that I am making will display all of that. :) Give me time.

That bot of yours seems like it's a really interesting project, I've seen you posting about it quite a bit (assuming even half of your threads in the Python section are about that).

I'm looking forward to seeing how beautiful of a program it'll be when you're done!

Hey man, we are all proud of you for real dude.

I actually owe you an awful lot of the credit. If I didn't read [your](#) thread I wouldn't have ever seen the potential in these coins and gotten this far.

Thanks, as I said earlier. Big things coming for this. Been speaking to LASS3 and other top-notch users about things I am going to add which would be useful.

Its working with Poloniex and Bittrex now.

Thank you very much! If you did ever want a copy of the bot Im creating PM me. I'm more than happy to give you a copy (when its done, or use it in its very early beta).
