Thread: [Want someone who can help me hack into csgo gambling sites.](#)

gtb.sg - May 1, 2017, 2:22 pm

I need to know the rolls etc.

I see this as a fairly easy way to make money. Get the rolls, get up to a couple thousand in a hour or so, sell the shits for bitcoin.

Payment: 60% of profits after selling skins

Sites such as:

CSGOEMPIRE.COM

CSGOACES.COM

CSGOPOLYGON.COM

BETS.GG

im completely inexperienced with hacking but if anyone is able to do this I'm down.

Let me get this straight, you are looking for somebody who knows how to hack the sites, and they are supposed to give you 40% of their earnings for nothing in return?

Someone ironically had just hacked a site my best buddy uses. Unfortunately he made a purchase on the site, malicious intruders gained elevated privilege and accessed the database, made a fuckload of charges to their debit card and he and his mom literally only had like 200\$ to their name, now they're broke and rent was due yesterday. I feel bad for them, honestly if you're looking to have someone do the work on sites like that and all you want is the roll, you can shove where the sun don't shine.

Plus if someone's going through the trouble of doing this they sure as fuck won't do it for 40%, you can let them take whatever they want and you can have the scraps, which honestly would still be more than you can imagine.

LUL yeah no fuck off mate.

"Hey mate, I'd love for you to teach me how to make X money for free. So then I can give you 40% of the 100% of the money you could make yourself."

Worst Best business strategy I've seen in a long shot brother, keep up the great work.

Reality check ([Click to View](#)) You're a wanker.

Even if someone did this, why would they tell you they have done it when they can make 100% profit instead of 60%.

The logic behind this thread is next to none.

You want someone to do all the work and give you 40% of the profits? Don't like your chances with this. If someone could 'hack' these sites they would do it by themselves.
