Thread: [Free DNA Test Kit \(Worth \\$200\)](#)

xatt - May 1, 2017, 7:43 pm

I came across a legit way to get a DNA testing kit where you are sent a spit kit and your saliva is used to analyze your DNA and you will not only find out where your ancestors are from, but you will also receive raw data that can tell you if you are prone to certain diseases or which traits you are carrying.

As you might have seen Ancestry and 23andme are offering this service but it costs \$200. With this, you spend a little time and get it for free instead.

PM me and I will tell you what to do!

This is open to any upgraded user!

U.S. ONLY!
MUST BE 18 OR OLDER.
