Hi there,

I ordered this one [here](#)

When I plug into my PC it doesn't seem to work, but I'm pretty sure that I have to open it with a certain application but does anyone knows which one?

ShenZhen, China

Never EVER buy an USB from China.

They are all fake with fake memory storage on them.

Edit: I'm retarded I saw the Title and the image and thought you ment that you bought an USB and that it was "bad" (Not working).

Here is a guide on how to use it

<- Same as you bought
