Thread: [sites like majyx and pscan are "outdated" ?](#)

Theboyz99 - May 2, 2017, 8:05 am

are sites like majyx and pscan that don't "distribute" using outdated scanners by any chance?, because i tried scanning a not fud file on majyx and it gave me 3/35 , and on virustotal 37/60 and weird enough , same avs that detect it on virustotal doesn't detect it on majyx why is that? although they are the same

i have Bitdefender paid, and it detects the file instantly at download but majyx shows it as clean??? wtf

here is scan results:

<https://scan.majyx.net/scans/result/144c8f082fdc90422ecbd43bdafde069412559ff>

<https://virustotal.com/sv/file/ff068fd9f867bb0e5dfeea8ddda6e383307701cbdd436a8cdb7400fe3347d31d/analysis/1493737005/>

Do you get the same results on that file when you scan it with Pscan?

<http://pscan.xyz/results.php?id=vhMQWOOxOWOCNKRI>

pscan seems to be more reliable and actually using up to date scanners.
