Thread: [TokenCards ICO reaches \\$12 million ETH in 15 mins.](#)

Adoc - May 2, 2017, 12:08 pm

Hello guys, today there have been the TokenCard ICO at 4 PM GMT and it managed to reach \$12.5 million ETH in about 15 minutes more or less.

It was even faster than Gnosis. I am just advising it before it even launches on any exchange. Watch out for this token guys. The token has made different partnerships with a lot of other crypto's companies such as SingulardTV, DigixDAO and other Ethereum's chain companies.

Do your own researches!

<http://www.huffingtonpost.com/entry/59088a67e4b084f59b49fcad>
<http://tokencard.io/>

Etherscan ERC20 Token Contract 0x65B9D9B96bccE0b89d807413E4703D2C7451593a (they already given the tokens to their investors)

<https://etherscan.io/token/0x65B9D9B96bccE0b89d807413E4703D2C7451593a>

The token will make the boom, and has high potential. Gnosis has been listed on Poloniex the day the tokens got released, I think Poloniex likes high volumes. TokenCard will be added as well on Poloniex because why not? they love high volumes.

And.... I've seen the ICO and smart contract going time by time and I can say Kraken has done a rc and purchased 32k ETH for their exchange. Not saying more.

Watch out guys, might be your 2017 investment. Remember this post.

EDIT:

My investor group is trying to get some TKN from the ICO that there have been. We need to get some early TKN because they will be so good and a big opportunity to make money.

Fatblunts4me - May 2, 2017, 12:13 pm

How do you buy it?

Ccex or poli?

They are not quoted on exchanges yet. I am creating this thread in advance, advising you even before the token gets on the market.

So you can do your researches and decide what to do, if to ride the wave or not. Your choice.

Mostly like it will be listed on Poloniex, Bittrex and Kraken. Poloniex loves high volume, this coin was even faster than Gnosis. Bittrex usually love it also and Kraken because has bought 32k ETH for a reason.

Gizmo - May 2, 2017, 12:23 pm

Great post, OP.

I saw ICO today, but I was late to invest something. Lets see where this gets.

Wre@ked - May 2, 2017, 12:54 pm

OP is an awesome guy and truly knows his stuff. I am really looking forward to this being released on the exchanges!

RushB - May 2, 2017, 12:55 pm

I was about to make a thread.

The ICO ended. Some people already have the tokens in their wallets, others are waiting. There are some problems that required attention due to the ERC-20 tokens that got in after the ETH cap was reached, the total value of the ICO is greater than 12.5M\$, that is just the ETH amount. We might see a correction regarding the total TKN created.

An official statement is yet to be released.

420coupe - May 2, 2017, 12:58 pm

damn interesting

definitely going to be investing 1k into this. hopefully it launches after may 10

Yes this is correct, a total of 43 milion of TKN have been created where only max 25 milion should have been created, including all the bonuses. There were some issues with the smart contract. We need to wait for news regarding this.

minimalist - May 4, 2017, 8:11 pm

Apparently somebody fat-fingered the price per token for SNGLS so those who bought into the ICO with SNGLS received 10x more than they should have. Can be corrected with a new contract.

Adoc - May 6, 2017, 5:28 am

Good news, almost finished the last things. They are about to get quoted on exchanges!

LuxuryModelNetwork - May 6, 2017, 5:55 am

how much does 1 token cost and how do i get them

Don Genovese - May 6, 2017, 7:10 am

This is going to be amazing!

RushB - May 6, 2017, 7:17 am

They are not going on the exchanges. The new contract is not deployed. They are working on Kovan and if everything goes smooth they will deploy the contract on the network and all of those who contributed in the ICO will get their TKN.

The actual TKN where not officially released and the devs said nothing about that address, so they are worthless. If you buy them, well, you get scammed.

"Hey guys, we're at like "silver master" stage — testnet contract being published in an hour or so with balances

our external re-audit turned up some 'nice to have' items and no critical items so that's good!

The current plan is the european folks will publish the sample and I'll review tomorrow AM,

presuming everything is good we'll redeploy the same stuff to live.

One thing we're spending some time on is shrinking the gas costs for redploying yeah! after deployment to main, the contract will be paused until Mel says 'go' — to give time for MEW, exchanges, etc. to update. Shouldn't take long, but the word 'orderly' is being used a lot this week.

if you think about it, we don't want to rehammer the blockchain, so lowering gas costs of minting through a variety of methods."

vessen confirmed this is ok.

<https://etherscan.io/address/0xaaaf91d9b90df800df4f55c205fd6989c977e73a>

They will post an official update.

I wish I knew about this when the ICO was on-going. There's no way to buy tokens now until it gets added to an exchange. Grr.

For everyone that is holding these tokens. There is a huge possibility there will be a lot of hype and pumping on these tokens tomorrow since it's getting listed on the exchange. Remember, this is the same coin that reached 12.5M ETH in 15 minutes.

If it peaks at \$5-\$10/token tomorrow the best course of action is to dump all your tokens at it's peak.

:P

Then buy back later on.
