Thread: [Best use for my 64 core, 128GB, 20 Gbit Server?](#)

Leroy Jethro Gibbs - May 3, 2017, 4:56 am

Probably only gonna have it for a month. Any ideas what to do with it? I can't do anything like ddos or something stupid like that.

10x - May 3, 2017, 4:56 am

Run a website on it lol?

Use it for cracking?

Possibilities are endless.

I might use it for cracking. Its an amazon AWS server so I would need to do it pretty quickly. Someone want to help me crack some shit?

ProtectNull™ - May 3, 2017, 5:06 am

Mine some cryptocurrency with it.

Leroy Jethro Gibbs - May 3, 2017, 5:09 am

Thats what I'm doing right now lol. I figured I could do something else with it as well though since I have no idea how long it will stay active.

Prophet Banana - May 3, 2017, 5:24 am

Run a RSP server that merges with a MineCraft server that merges with a Habbo server.

Yes. Yes. Yes. Yes. Yes. Yes.

Honey S?ngh - May 3, 2017, 8:06 am

Make your own media server!

Render stuff!

Seedbox!

Cheese Doober - May 3, 2017, 8:07 am

What coin are you mining? What sort of profits are you making? I have a couple spare vps's im not using either.
