**Nexus Zeta** - June 7, 2017, 8:32 am

Truly the first person I've come across on this site that actually explained things as they are and is straight up "This is what you're paying for, this is what it WILL do and this is what it won't do". I haven't paid yet ( need BTC, and the ATM is at the mall) but without a doubt someone I feel safe taking advice from about these kinds of nets.

**RCE** - June 7, 2017, 10:51 am

**KillerSavage** - June 17, 2017, 5:09 pm

Here is my honest review: These bots won't stay for too long, this service is crap 100%, Purchased 30 bots for \$5, and I got like 1 bot, my RAT has been crypted and I scanned it and it has no detection, he kept on saying it's my stub that is corruption but I tested my stub on a friend PC and it worked. I asked the dude if i could rebuild a stub and see if it's because of the ICON I use when cryping my rat he said this

Quote:shortcut this talk , it was ur fault from the beginning because u give me corrupted stub , and if u want new bots u should buy for it , and as bots sellers u pay for executions not for numbers.

I don't think this service will last for long if the Seller doesn't get fresh bots or something. GLWS

## My Review

Quote:[7:04:33 PM] Kratos: Am gonna leave a nice reply on your thread  
[7:05:01 PM] ? ShadoBIH ?: you will be reported to stuff because trash replying  
[7:05:14 PM] Kratos: na it's my review  
[7:08:08 PM] ? ShadoBIH ?: go a head and u will get banned for trash posting on my sale thread

OP reporting me for my review of his bots.

Very supportive and reliable service. Big Vouch from me.

Thanks for your Botnet service. ?

GLWS! ?

P.S. I'm noob at Botnet stuff. But he's trying to help me out. And I think I'm learning good. ?

**bitsector20** - June 21, 2017, 11:21 am

huge vouch for shado. He takes his time and makes sure he gets the job done RIGHT. not like a lot of others that just throw it together in a minute and then disappear when something inevitably goes wrong. He is certainly capable of doing that, but instead takes the time to ask his client preference questions, and make sure client is happy with service. Shados' a sharp guy, who can go outside the comfort zone of what his service chart offers. He actually understands everything he's doing and can apply it to a myriad of different situations.

don't hesitate, a good mate.

**RCE** - June 21, 2017, 12:39 pm

**bitsector20** - July 3, 2017, 6:32 pm

yo yo shado you NICE TO SEE YOU PROSPERING NICELY! I got a new venture I'm working one everything organized, now own L!nks and smoke, though could only afford the resident loader atm, the offshore BP VPS is really making me budget carefully but man everything isworking better than you can imagine (including the !lnks you helped me install with the expensive extra plugins that I got roped into buying despite not being fully ready (will be done anytime now) from the horses mouth. Otherwise its fucking great. L!nk isn't the most stable, but I was up to 800 bots in a week

WITHOUT straw hut bot shops, save for testing. Anyways, the plugs work fucking great and my vps flies with. only problem is we all know its not the most stable. BUt I've got some great ideas now that I have a smoke the stabalizer along with 10 extra domains :) hit me up on jabber if you have time. to talk about somet things to see what you think. I could really use a bit of your technical prowess in your specialities. no pressure :P best of luck to you brother

RCE - July 3, 2017, 6:33 pm

No need to write more words, btw the problem has been resolved .

bitsector20 - July 3, 2017, 7:14 pm

woah, sorry to poke my head in your business shado but is this fugging guy above you really bitchng about a CRACKED bot that likely came with a FREE HOST and is now asking for a fucking refund? I didn't read anymore than the post above, but my guess is he paid a few dollars for not only for a WORKING CRACKED BOTNET, FREEE HOSTING (WHICH I HOPE YOU'D EXPECT THAT TO RANK RIGHT DOWN THERE AT THE BOTTOM OF THE PORT-O-JOHN) BUT ON TOP OF ALL THAT god forbid you need a setup too. and you got 45 bots to play with? and you think that's a shitty deal? do you have any idea how much botnets cost? I paid \$800 for L!nks + hidden rdp and filemanager plugins, \$300 for a resident smoke loader, and I pay 175 quarterly for an OFF SHORE level 4 Linux centos7 VPS that is not only bullet proof but the specs are almost equal to my own workstation. Have you ever looked into what botnets do , what theyre for, or any of that? beause you will not accomplishing ANYTHING with the budget your throwing together.

don't get me wrong, the service you got is a great deal and great for learning the basics and practicing, but if you have this fantasy in your head that you are getting this great steal in your head away from the rest of us who have to pay thousands o dollars to monetize, you've got a lot to learn man. Its 1 thing to not be aware and have high expectations, but to attack one of those most patient serviceman on this site with a ton of knowledge because your 30 bucks didn't make you a bunch of money?.....well I'm sorry all I can say is its time you read the other parts of this website, besides market place.

And If I am wrong with my assumption and you did buy a real liscence from an author and the botnet was suspended after a week. well you either did a horrible job choosing real off shore BP hosting, or you actually spent hundreds to thousands on a botnet and then paid for a setup said 'what the heck may as well take the free host too!

I'm sorry for coming off as a dick, but its only because I couldn't believe my eyes when you were demandin a refund. before I bought my first license B\*\*\* bot back in 2012 I made the same mistake as you thinking, why are these guys paying 2k on a botnet, these HF'rs are selling them for 25 bufcks?! well guess what, that one lasted 3 days before it was suspended. you think I got my money back ? fuck no! and in that case I probably should because its not like I was trying to load hundred o bots, I was just trying to eperietn on a few and see what could be done. you need to use your head. if you are paying for a service that cost X amount of money you aren't going to receive a host that cost 10X as much to keep you outta trouble ( is pretty much what it takes to be safe (not too mention the massive amount of knowledge you need to know in order to keep your head down). Alright I'm done steaming. Sorry for hijacking your thread shado, halfway sorry for yelling at tohka, but its time to get down here to planet earth. I don't know if this is against the rules here because HF is a GREAT rforum, but it might be time for you look around at some other places too and spread your time and learning out a little bit. This is a very segregated group with some incredibly smart and good ppl. ovviously plenty o the opposite. I'm done here. just think a little bit more about what youre bitching about and what you think you deserved for the sum o money you paid. RResearch helps a great deal with that. (tip: you still got your cracked bot, go load a you tue video and do it yourself. LEARN. its cracked who cares if you fuk up)

anyways, sorry again shado, had a rough weekend.

Sorry man, you should still contact me though?

**Magician.** - July 3, 2017, 7:36 pm

(Jul 3, 2017 07:14 PM)bitsector20 Wrote: [\[CITE\]](#) woah, sorry to poke my head in your business shado but is this fugging guy above you really bitchng about a CRACKED bot that likely came with a FREE HOST and is now asking for a fucking refund? I didn't read anymore than the post above, but my guess is he paid a few dollars for not only for a WORKING CRACKED BOTNET, FREEE HOSTING (WHICH I HOPE YOU'D EXPECT THAT TO RANK RIGHT DOWN THERE AT THE BOTTOM OF THE PORT-O-JOHN) BUT ON TOP OF ALL THAT god forbid you need a setup too. and you got 45 bots to play with? and you think that's a shitty deal? do you have any idea how much botnets cost? I paid \$800 for L!nks + hidden rdp and filemanager plugins, \$300 for a resident smoke loader, and I pay 175 quarterly for an OFF SHORE level 4 Linux centos7 VPS that is not only bullet proof but the specs are almost equal to my own workstation. Have you ever looked into what botnets do , what theyre for, or any of that? beause you will not accomplishing ANYTHING with the budget your throwing together.

don't get me wrong, the service you got is a great deal and great for learning the basics and practicing, but if you have this fantasy in your head that you are getting this great steal in your head away from the rest of us who have to pay thousands o dollars to monetize, you've got a lot to learn man. Its 1 thing to not be aware and have high expectations, but to attack one of those most patient serviceman on this site with a ton of knowledge because your 30 bucks didn't make you a bunch of money?.....well I'm sorry all I can say is its time you read the other parts of this website, besides market place.

And If I am wrong with my assumption and you did buy a real liscence from an author and the botnet was suspended after a week. well you either did a horrible job choosing real off shore BP hosting, or you actually spent hundreds to thousands on a botnet and then paid for a setup said 'what the heck may as well take the free host too!

I'm sorry for coming off as a dick, but its only because I couldn't believe my eyes when you were demandin a refund. before I bought my first license B\*\*\* bot back in 2012 I made the same mistake as you thinking, why are these guys paying 2k on a botnet, these HF'rs are selling them for 25 bufcks?! well guess what, that one lasted 3 days before it was suspended. you think I got my money back ? fuck no! and in that case I probably should because its not like I was trying to load hundred o bots, I was just trying to eperietn on a few and see what could be done. you need to use your head. if you are paying for a service that cost X amount of money you aren't going to receive a host that cost 10X as much to keep you outta trouble ( is pretty much what it takes to be safe (not too mention the massive amount of knowledge you need to know in order to keep your head down). Alright I'm done steaming. Sorry for hijacking your thread shado, halfway sorry for yelling at tohka, but its time to get down here to planet earth. I don't know if this is against the rules here because HF is a GREAT rforum, but it might be time for you look around at some other places too and spread your time and learning out a little bit. This is a very segregated group with some incredibly smart and good ppl. ovviously plenty o the opposite. I'm done here. just think a little bit more about what youre bitching about and what you think you deserved for the sum o money you paid. RResearch helps a great deal with that. (tip: you still got your cracked bot, go load a you tue video and do it yourself. LEARN. its cracked who cares if you fuk up)

anyways, sorry again shado, had a rough weekend.

Sorry man, you should still contact me though?

All you do is waste your money in a huge scale. Dont say you dont care about money or other bullshit.

bitsector20 - July 3, 2017, 9:20 pm

oh dear. good friend door to door salesman magician. You know nothing about me and tend to keep it that way to a great extent. I have absolutely nothing to prove to you because ppl like me do not need to do things like that. I am lucky that I was a hard worker and made my dreams come true by retiring at the age of 26. My guess is your overall status/worth of a human being is nowhere near mine, though of course that is just a guess. You could be a millionaire living in a mansion for all I know. But what I do know is that I am a dedicated extremist who never actually failed at anything halfway relevant in life. Statistically speaking you will likely never be as good at anything in the world compared to my previous profession which I am blessed enough to still monetize off it without being signed or employed if you will. Again, I could be wrong but these are simply hard and fast stats and the chance of you being prodigy or as dedicated as I was to succeeding quite frankly somewhat low.

My first professional career post college had nothing to do with computers, but using computers as an outlet for creativity dates far back to my elementary years, and at the age of 13 I was a professional (as in I made money on a low scale, but had a notarized business where I carried 3 clients for almost 2 yrs) as a web designer. I'm likely older than you, and I was able to express my creativity with nothing more than notepad, html and utilizing java script. I also learned visual basic quickly (lol yes when I was 11- 12 I have to confess to designing AOL punters. but fug off I was core. then sub 7 was released and like many wanna besi purchased (or C\*rded- 1st and only thing ever) a massive C++ manual and at 13 attempted take my creativity to a seriously language. unfortunately, I found it to difficult to express my creativity. I had no idea what it was about so I threw it away, got a gf and took on new hobbies. fast fwd 13 yrs and I had accomplished my life's long term goal and had trouble makig new ones. I decided to get back into creative monetization now that I had fluff, saw a future in btc and started investing at 5 bucks a coin. I decided to train others, write non published ebooks and ran a currency exchange. finally decided I wanted to get back into my old hobbies, which essentially bein a nerd on a computer, caching up with technology. ran my own businesses at my own pace that included advertising SEO and my vague strength of social engineering. Ironically enough I had a double major in sales and marketing along with a minor n music theory. so I ended up at the forefront of the social engineering boom. It was at this point I discovered the oncept of botnets so I researched it , ame up with some great though perhaps not original ideas. I purchased b\*\*\* bot in 2012 and again, I cant be sure, bbut statistically speaking I likely made more money than you did using that along with a bunch of other products to creat a large list of monetary concepts. But oh dear god (I didn't install it myself!) what an idiot I must be for not putting installation at the forefront of an \$899 program. for ome crazy reason since I had ideas I wanted to use and I wantedi t TO WORK, I thought-and iknow totally off the wall ridiculous- why not have somone else who specializes in Linux and basic function of botnets?!?! there are still some obsolete unpublished ebooks to this day floating around about BB +netwire +etc monetization. well like I an extremist with borderline OCD I had succeeded financially and had absolutely needed to work on other things in my life. Fast Fwd 2015 my cousin died a shitty death and I got a computer bug again. no needto elaborate on that, but this is literally almost 4 years later and found myself on hf (among many others) and I was curious how botnets had progressed. to my surprise not ver yfar, though there other things moving a mile a minute.

Well our good friend magician the magician magically stalked me checking ou bot nets in 2017. so in door to door tyle fashion he stuck his foot in my front door and tried to tell me he could do the best job ever at installing a botnet. I NEVER approached him for a service. he inovled himself in my personal business. and started calling me a skid because I wasn't abotnet expert er something. I had a really hard laugh at this. kid has no idea whohes talking to and that make it even better. and then the magician o all megicians proved his worth by negging me points. I was very distraught ? It was at this point that I had finally found a new goal in my life as my shrink had suggested: become

as good as musician. period.

**RCE** - July 4, 2017, 10:52 am

(Jul 3, 2017 06:32 PM)bitsector20 Wrote: [\[CITE\]](#) yo yo shado you NICE TO SEE YOU PROSPERING NICELY! I got a new venture I'm working one everything organized, now own L!nks and smoke, though could only afford the resident loader atm, the offshore BP VPS is really making me budget carefully but man everything is working better than you can imagine (including the L!nks you helped me install with the expensive extra plugins that I got roped into buying despite not being fully ready (will be done anytime now) from the horses mouth. Otherwise its fucking great. L!nk isn't the most stable, but I was up to 800 bots in a week WITHOUT straw hut bot shops, save for testing. Anyways, the plugs work fucking great and my vps flies with. only problem is we all know its not the most stable. BUt I've got some great ideas now that I have a smoke the stabalizer along with 10 extra domains :) hit me up on jabber if you have time. to talk about somet things to see what you think. I could really use a bit of your technical prowess in your specialities. no pressure :P best of luck to you brother

Thanks for ur kind words, ill take it as advice in the future :)

**visfinity** - July 8, 2017, 12:02 am

**adamfeed2** - November 19, 2017, 1:58 am

interested in your service. some questions:

do I automatically get some bots in the botnet after purchase? or do I have to do the spreading?  
what hosting do I need to purchase? any recommendation?

thanks

**RCE** - November 19, 2017, 2:07 am

@adamfeed2 , just messaged you about your questions,if u have more feel free to pm.

**pickledickle** - November 19, 2017, 2:29 am

Forgive me if this is a newbie question, but is Skype secure for this?  
Isn't there a better way to contact you?

**RCE** - November 19, 2017, 11:08 am

@pickledickle ,it's not big case at all, but if u want to add me on jabber let me know so i can send my id to u.

**RCE** - December 9, 2017, 10:26 am

back from my work, i've messaged everyone added me , thanks for your patient.

**eLordofWork** - December 23, 2017, 12:03 pm

Wha the best bot you have?

(Dec 22, 2018 08:39 AM)martigo333 Wrote: [\[CITE\]](#) Sorry about that boss, I'm just trying to give the  
community something worthwhile. Apology

Go create your own thread in the right section and next time you're doing giving aways give  
accounts that are actually accessible not inactive and invalid login details.

**RCE** - December 23, 2018, 10:37 am

for everyone messaged me on jabber, I've got an unexpected issue and ill be there in the next 24h.

sorry for any inconvenience

**Kid's** - December 24, 2018, 7:05 am

Please deliver my setup. I have paid and it's been 2 days. I was promised delivery within 24 hours. I hope I didn't get scammed.

**RCE** - May 8, 2020, 7:50 am

The service has been back!

Order from #1 Botnet setup service now!

**Hero** - May 10, 2020, 5:41 am

Are there any new botnets available? Something which is really stable to hold the bots?

**RCE** - May 10, 2020, 6:31 am

(May 10, 2020 05:41 AM)Hero Wrote: [\[CITE\]](#) Are there any new botnets available? Something which is really stable to hold the bots?  
Yes its available, I can provide also private botnets for multiple purposes.

You can add any of my contacts and discuss what you need.

**Hero** - May 10, 2020, 6:47 am

Can you send me a list of available botnets?

**SIM-4676717** - May 10, 2020, 6:23 pm

Can i have a discount price to make an updated review of your service?

**RCE** - May 10, 2020, 7:33 pm

@Hero, Sent you a message.

@Sir Savage, messaged you about this.

**SIM-587985** - May 13, 2020, 1:08 am

Hey so I'm interested in this, but wanted to know if you have the botnets to setup or I had to find them somewhere else?

Also can you provide domain/hosting/test installs?

-wardyn

**RCE** - May 13, 2020, 4:09 am

(May 13, 2020 01:08 AM)Wardyn Wrote: [\[CITE\]](#) Hey so I'm interested in this, but wanted to know if you have the botnets to setup or I had to find them somewhere else?

-wardyn

Hello Wardyn,

Both options are available, we can provide you botnet with hosting or you can provide us your botnet for setup,

for more info please add any of my contacts.
