binder

You can also use it to bind together multiple files inside a single, encrypted .exe container, which will decrypt and run all bound files on runtime when it gets executed.

Unlimited File Binder

- Execute
 - Normal
 - Hidden
 - Memory Execute
 - Don't Execute
- Install Directory
 - %Root Drive%
 - %Desktop%
 - %My Documents%
 - %Application Data%
 - %Program Files%
 - %Program Files (x86)%
 - %Windows Directory%
 - %System Directory%
 - %Temp Directory%
 - %Startup Directory%
- Commandline Paramaters Support
- Encrypt
- Custom Extract Name
- Compression
- Set File Older Date

setting

You can select startup methods from here, instalation directory, watchdog modules and Anti's

- Start on system startup
- Startup Methods
 - Scheduled Task
 - HKEY LOCAL MACHINE
 - HKEY CURRENT USER
 - USERINIT
 - ACTIVEX
 - WINLOGON
- Installation Module
 - Install Directory
 - %Root Drive%
 - %Desktop%
 - %My Documents%
 - %Application Data%
 - %Program Files%
 - %Program Files (x86)%
 - %Windows Directory%
 - %System Directory%
 - %Temp Directory%
 - %Startup Directory%
 - Install Folder
 - Install Name
- Watchdog Modules
 - Protect File & Process

- Protect Registry Entries
- Mutex
- Admin Priviledges
 - Priviledge Escalation Exploit
 - Disable UAC
- Additional Options
 - Set File Older Date
 - Melt Original File
- Anti Analysis
 - VMWare
 - Sandboxie
 - VirtualBox

go go fuck all cryptor this is best in the world !!!!!

2b7 - May 5, 2017, 2:11 pm

Vouch

Top quality services.

Guaranteed HQ products.

franklin83 - May 5, 2017, 2:21 pm

that products looks promising, gl with sales

gifar_uCuL - May 5, 2017, 3:26 pm

thnaks all go go with order

gifar_uCuL - May 8, 2017, 10:09 am

boom boom up go go go with good protector

BI?ckhat - May 8, 2017, 10:18 am

Wish you luck with sales, looks promising.

gifar_uCuL - June 8, 2017, 10:20 am

sorry to all guys if no buy dont say shit and dont wasting time !! thanks

mehtevas - June 8, 2017, 10:25 am

please post it in the crypter section:

[Cryptography and Encryption Market](#)

"Realign PE Headers

Strip Relocations

Wipe the DOS Stub"

why lol, just erase the headers completely

"

Encryption Algorithms

Twofish

AES

Blowfish

DES

Serpent

Camellia

RC4

Skipjack

TEA

XTEA"

...why? XOR does the job

"Priviledge Escalation Exploit"

As in UAC bypass? Because bypassing UAC is not elevation/escalating privileges
