Instructions and Help: 10/10

The owner is really kind and helped me a lot with running the crack! I recommend you talk to him if you encounter problems cos he is a great guy and is patient with you. I used teamviewer and he didn't do anything suspicious at all! You can trust him. If he is offline i'm gonna give you the instructions he gave me.

Spoiler [\(Click to View\)](#)

First of all when you buy it you will receive the program and the instructions:

Let me explain what you have to do. Create a file named proxy.txt and then search on google for free proxies and then paste them in that .txt file. this is really easy. you can find proxies anywhere. after you are done doing that create a file named combo.txt in here you will put some accounts in this format: Username:Password just search on google for that too. after that all you have to do is open the exe file and type how many threads you want.

Effectiveness: 10/10

I have only good things to say about this. and I am not saying it just to suck the creator's dick. this program is great and really helpful! i have been running it for 10-20 minutes and I got over 5000 accounts and it's still running!

Profit: 9/10

You can make a lot of profit with this program but it all depends on your luck. you can find a lot of good accounts with money in them and some with really cool files! if you are lucky you can find a lot of expensive programs! and of course: Free Movies! Who doesn't love free movies?

Should You Buy It? Is it Worth Buying?

Yes. You can make more money than you spent on it in 1 Day if you are lucky! i recommend buying this and i don't have a doubt you will enjoy it!

Ease of Use: 10/10

This tool requires absolutely no previous knowledge for anything except Google. You need to find proxies and a combo list, and the program does everything else automatically.

Effectiveness: 10/10

This product runs absolutely perfectly. Not many people crack Mega.nz accounts, so almost any combo list will contain some accounts. The program logs each successful account to a text file in another folder. Each text file shows the user:login info and any files/folders on the account.

Cost: 10/10

This program is an absolute steal for \$9. You can find some real jewels in people's Mega accounts, whether it's porn, hacking tools, private information, anything you can think of!

Extras: I downloaded a semi-fresh, public 1 million combo list and used some free proxies. I used 10 or 20 (don't remember exactly) threads and let it run for about 2 hours while I played some games. I've cracked over 80 accounts, some with some interesting finds.

All in all, this product is a no-brainer. If you want to have some fun and find some crazy shit, pick this up ASAP!

Why do you have to pretend to go through this whole vouch copy fiasco when it is clearly rigged since you bump each others post all the time?

Is there a way to output only the good ones?

It outputs automatically the good ones on the archives, any bad combination is outputted on a textfile.

seems really interesting but I have some doubts on the real gain for this ...

U need first a HUGE list of mega accounts ... where do you get that ?

Then second u need also a good password file ...

It's not a win win solution ...

Am I wrong ?

You can make your own combolist or just scrape on some forums and get them, I scrape combos and I found a lot of weird shit so don't worry, it's so easy.

Looks interesting. Going to go ahead and change all of my mega passwords now...

Sickness - May 12, 2017, 2:40 pm

Added Title status (will tell you how many combos done/left, how many good accounts and your settings)

Added a basic filter (Will only save accounts with files in them, no more empty accounts if you don't want.)

Added more error handling, increasing the speed.
