Why am I selling this ebook for \$200 when it can make thousands of \$?

Well, simple. Online Gambling is not legal in my country. I can use the method but I can't withdraw the money because they need my ID and personal documents. I've had to give vouch copies to trusted members for them to test it. \$200 is a lot of money to me. I hope I get many sales :)

If you want, I can increase the price. But I need to have a basic customer base and demand first :X Since it is my first time making an ebook I do not want to be greedy. I know very well how that worked out for me. The start is always the hardest, as I need very good vouches from prominent people to snowball my sales. I'm sure with the high quality of my ebook it will be sustained.

Please enjoy a relatively cheap profit making method. I took many hours to write this. I am sure you will be very happy.

Vouch copy given to Oliver Products, enjoy making money. It would really help me significantly if you included proof of earnings in your vouch too :) If you've made more profit than the cost of the ebook, do consider buying a legit copy to show your support!

Sorry Highlight :(

If you still doing vouch copies I have \$600 to invest and can post earnings.

You will need a few more vouchs before people start buying this for \$200

**hopeforme** - May 9, 2017, 11:15 pm

Hey, oops, this thread was not supposed to be open again, I forgot to close it.

The update now is that the method is verified working by Oliver Products from his Vouch Copy and he is very impressed with the method. He wants to partner with me to sell this ebook, but he was busy and we haven't set up the official thread yet.

I'm sorry, but because Oliver Products with 1000 rep and a trusted seller is going to support me on this, I will not be providing another vouch copy for you for the same reason. After that huge sales thread is set up, prices may increase or we may limit copies of the ebook sold. As some of you may know, he only sells very legitimate and trusted products because his reputation and image is on the line. Getting his approval was very difficult work, lol.

In short, the method will have more people using it. It can be saturated though, so the earliest buyers of the ebook will actually benefit the most.

Since Oliver Products hasn't replied me yet as he was busy and he hasn't setup the thread yet, I may leave this thread open for some early hype and interest (I don't actually expect many, or if any, people to buy with my reputation & statistics, lol). I will close it later after we get the official large sales thread going.

Feel free to PM me or comment if you have any questions.

We are very excited to share this valuable knowledge with you :)

Looking nice,very interesting.

Is there any problems cashing out because its "greyhat" can you get busted with this ?

If you need a review about this product HMU!

I wish you good luck with sales!

Kind regards,

Kind regards,

Cashing out is actually the hardest part of using this method ;)

I have included tips and tricks in the ebook to maximize your chances of successful cash out, but we cannot 100% guarantee it, since they sometimes manually inspect the withdrawals. Since you are potentially able to cash out 1 BTC by 1 BTC (if you have the capital; I don't have that kind of money because I was scammed of all my BTC from HF scammers) every time, the Casino loses money from this, and heads will turn.

Definitely, we have included many safety precautions in the guide for you to prevent getting busted, it's a very low chance. Since I have made very few sales yet, the people who buy this early get a very good advantage in this aspect.

It is due to the nature that it is so profitable that this will probably patch this soon. There is nothing wrong with the method, its just that casinos want to stop their losses, so it is natural.

Do go ahead and give it a try!

Hi,

Is this the double-spend method? Because if it is, you should remove the 100% risk free.

We take advantage of casinos which use a certain software so that it is risk free :)

If one wants to nitpick, sure, having the withdrawal being manually inspected by casino staff is a risk, but that risk also applies to normal players as well (who face the biggest risk of all: GAMBLING AND HOUSE ODDS, which is huge and disgusting. Those risks are responsible for 99.99999% of casino users losing money.), so we don't consider that in our marketing advertisements. Personally as I have a goal, I also want to make that money back.

Please support us:):)

You don't need to be a gambler to use this, anybody can do it. You just need to be legitimately eligible to apply to casinos.

So you are selling a public and well known double spend method for \$200? ?

**hopeforme** - May 10, 2017, 2:19 am

I have no idea what you're talking about dude...

I'm just a new-ish user on HF who got scammed of all my BTC, and am trying very hard to earn that money back via legitimate means and not the easy way out by scamming others the same way like an evil person.

My method is new and not well known at all.

From your tone it seems like you are being very sarcastic. Can you please not do that? Thanks.

So, you are saying that your method doesn't involve double-spend in Bitcoin casinos?

**Viitorul** - May 10, 2017, 5:46 am

Does it fucking involve double spending or no? just yes or no answer dude smhhhhhhf

Hi all,

Sorry for my delayed reply.

But I have asked some experienced users on HF and I now learn where the concern is. The so called "public and well-known" double spend method that you speak of (I think?) does not work because it has been patched long ago. Now almost all or all Casinos have learned from it and need at least one confirmation to withdraw. I suppose that is what you are worried about. You can't double spend on a casino and get away with free winnings out of thin air any more.

I repeat one last time that my method is new, few people know about it, and I include a lot of details and comments to answer any common questions or doubts that readers might face.

It is true that we use Bitcoin casinos in this ebook, but that is because anonymity is a premium when doing greyhat stuff. I shall not be baited into revealing what this "stuff" is, if you want to learn it please buy a legit copy of the ebook, thanks.

Hope for your support. We are going to setup the main thread after Oliver Products is ready.

EDIT:

On Oliver Products' advice, I am to close this thread until he is ready. Stay tuned everyone!
