Thread: [\[WebBuilder\] << The best keylogger around KeyDuck.com >> \[HTTP/FTP\]\[Polymorphic\]\[C++\]](#)

Edgy™ - May 6, 2017, 1:24 pm

p.s BTC is not accepted yet.

Vouches:

(May 18, 2017 02:32 PM)Rhez Wrote: [\[CITE\]](#) I highly vouch for this high quality product. I wish you good luck with the sales, buddy. ?

Kindfile - May 6, 2017, 1:35 pm

Vouch for Edgy - this is a professionally coded product with great potential.

Edgy™ - May 6, 2017, 1:59 pm

Online taking orders and awnsering questions.

Edgy™ - May 6, 2017, 3:55 pm

Online taking orders!?

??I?????? - May 6, 2017, 6:03 pm

No list of app and browsers it recovers from we need more information

Fortunate - May 6, 2017, 10:40 pm

Vouch for Edgy.

I can say that this is the best keylogger I've ever used.

Edgy™ - May 7, 2017, 12:21 am

I will hand out 2 vouch copies to trusted members!

M?xim - May 7, 2017, 1:04 am

(May 7, 2017 12:21 AM)Edgy™ Wrote: [\[CITE\]](#) I will hand out 2 vouch copies to trusted members! I know my fair share of keyloggers. Let me know if i am "trusted".

grogodil - May 7, 2017, 10:13 am

Which crypter works with this keylogger? Cyber Seal ,DataProtector ? Do you have any Cure file or how to remove it from my PC ?

Edgy™ - May 7, 2017, 10:49 am

(May 7, 2017 10:13 AM)grogodil Wrote: [\[CITE\]](#) Which works with this keylogger? Cyber Seal ,DataProtector ?Its fud by default But you can always crypt it, any c++ crypter should work.

coocochi - May 8, 2017, 12:18 am

Unfortunately, nothing on your thread or website says anything about if important features, like what browsers does can it recover, what mail client, what OS. Also i noticed it says delivery to FTP, does it have other delivery like email and webpanel?, and find it a bit pricey for a non-FUD Logger, More details will be appreciated though

Edgy™ - May 8, 2017, 4:33 am

(May 8, 2017 03:38 AM)M?xim Wrote: [\[CITE\]](#) I got a review copy of Keyduck on 2017-05-07.

First things that i noticed that should be improved or added:

It does not support SMTP as a delivery method

It does not have any password recoveries, which can be needed.

It does not have a messagebox, no pop-up box when you click it.

It is not "The only keylogger that can be built online".

The Terms of Service does not say anything about infecting.

It is not instant. Took me more than 2 hours to get the stub.

The seller claims that it is FUD but a scan gave me 13/63 detections.

Things that are positive about Keyduck:

Easy to use, using a web-based builder is always a plus.

Easy to build.

Hopefully you will look into my review and make edits accordingly. Best of luck with sales. Love the UI.Thanks for Your feedback,

Ill take this into my mind And search for solutions.

Thanks for Your feedback Will update thread soon.

Doesnt include password recovery

Friedrich Nietzsche - May 8, 2017, 12:35 pm

Are you sure you have achieved polymorphism aka self modifying payloads as stated in your thread title? I highly doubt that, considering I saw the original project being sold, and it did NOT advertise anything close to true polymorphism. USG != Polymorphism.

maldev0 - May 8, 2017, 12:59 pm

1. Care to show a visualization of your polymorphic engine to proof that it performs properly?
2. Mind sending me a compiled test stub so I can look deeper into it? I'll give you a honest review.

Kind regards

What a dick you must be, can't even compete with them fairly but instead choose to get a vouch copy to simply bash it and distribute it to AV companies.

Marwix - May 8, 2017, 10:06 pm

(May 8, 2017 01:06 PM)Friedrich Nietzsche Wrote: [\[CITE\]](#) Scanning your competitor's file on Virustotal? What a dick you must be, can't even compete with them fairly but instead choose to get a vouch copy to simply bash it and distribute it to AV companies.

He got a high detection rate but it does not necessarily mean he scanned it on VT.

Maybe he did it by accident, who knows.

Besides, are you the developer?

Edgy™ - May 8, 2017, 10:36 pm

No I am not the developer. The fact that you cannot compete fairly but instead decide to intentionally destroy other people's product by distributing it to AV companies shows how much fear you must harbor for product. Maxim and you are both affiliated with that Java keylogger of yours, which I find laughable to be honest, especially this statement:

I don't want to get involved in any of your facts or statements. I only tell you what I believe or think.

I prefer not to discuss this on this sales thread. If you want to take it with me in private, then send me a PM with your discord.

Edgy™ - May 8, 2017, 11:35 pm

Just sold the first copy!

M?xim - May 12, 2017, 5:39 am

This is a sales thread and not the lounge. Keep it clean, do not go off-topic anymore. There are private messages for a reason.

Edgy™, best of luck with sales. And sorry for scanning it, I have never dealt with exe keyloggers before.

Whogivsachit - May 13, 2017, 1:36 pm

Interesting... looks really well made!
