Thread: [Email bomber that inbox 100% \(small amount of email\)](#)

Emilz - May 7, 2017, 7:08 am

Hey guys,

Im looking to buy a email bomber that sends like 100-200 emails to the inbox of hotmail,gmail,yahoo etc.

The message in the mail can be gibberish like asdfogasdoihf, so the text the email contains doesnt matter. Aslong as i can send like 100-200 emails to inbox in a click of a button.

I dont wanna be buying other stuff like smtps after, a friend of mine had this program thats why i know its possible.

Scammers wont succeed so dont try it.
