Mr. Reviewer - May 7, 2017, 8:55 am

BEFORE YOU READ THE REVIEW

Spoiler ([Click to View](#))

-You must understand that the reviews I make are from my point of view.If I grade 3/10 that doesn't mean the method itself is bad, maybe for other people that method is 7, so keep this in mind when you're reading my reviews.

-My reviews will probably piss off many people and break some of their businesses ...or raise them.This means I will not debate with the sellers whether or not my reviews are accurate.Unless there is really something wrong I won't recheck my analysis.

-I review good and bad products, not only bad products as some of you may suspect.The decision will remain yours if it's worth it or not.

FAQ

Who am I?

Spoiler ([Click to View](#))

A random guy that bought dozens of methods in the past few months from HackForums Sellers, and with disappointment, I announce that 90% don't work or they require insane hard work to even get them started. Highly "vouched" methods, with "valid proofs" from so highly upper-class "highly vouched members/old members" or how you want to call them, methods that look good on paper but on practice leave you with a sour taste in your mouth and with dust in your wallet.

What I'm going to show you?

Spoiler ([Click to View](#))

Few angles to look at when you're buying a method and few insights of what each method consists of.

I will keep this short and say this - you don't have to become an investigator but in the end is YOUR money and YOUR time you're going to throw at a random guy that promises you the moon.

REVIEW:

Vouches:

Spoiler ([Click to View](#))

0/10

-99% of vouches are not from his thread. On his main post, he uses the vouchers from his other threads to rise sales in this product.

-In 105 pages there are like 2 vouches that posted screenshots of earnings, however, the screenshots show profit, not made with a phone or filmed, also, they don't mention how much they invested nor what methods they've been using.

Vouches such as "Vouch for X, he always has great products!" , "You can't get wrong with X!" , "I vouch for this guy he knows what he's doing!" , "I tested out this product, it works! Great Product!" are not taken into consideration. Vouches without legit-proofs are not taken into consideration. Vouches from your other sale threads are not taken into consideration. Text-proofs are not taken into consideration. This is a community and in the end people connect to each other either by friendship or a common interest they'll provide a vouch.

Profits:

Spoiler ([Click to View](#))

5/10

-Each few weeks the seller seems to update his main post with fresh earnings from his methods. Big plus.

-He provides a video proof, however, this is from 2016.

-Proofs are screenshots, not made with a phone or filmed. Nor does it mention the investments.

Methods:

Sonox Methods:

Before yelling that I'm giving the methods away, no, I'm not, the seller specifically says in his main post what METHODS he's selling, that's why I'm referencing to them as "EBAY METHOD" or "CPA METHOD".

Ebay Method

How much investment does it require?

Minimum of 30\$ is required.

Description:

Dropshipping. Not gonna lie I'm getting tired to see everyone selling this method or versions of it. However, the seller provides you a-to-z guide about dropshipping process and how to put it to use. He also provides you a tool to quicken your searches on this respective marketplace.

Time:

Requires analyzing the markets, finding a niche/products. Time.

However, time it's connected with the investment here. The more money you invest, the more time you'll have to put in.

CPA Method

How much investment does it require?

Minimum of 15\$ is required.

Description:

CPA. The method is not unique, it's well known if you are not new to CPA. However, the seller provides you a-to-z guide on how to get it going.

The Twist part it's indeed interesting, however, this will be available after you start making money.

Time:

The set-up may take a couple of days.

Requires re-investing and may trial&error it due to saturation / other factors out of our control.

Affiliate Marketing Method#1

How much investment does it require?

Minimum of -random- is required.

Description:

Requires a bit of marketing, you want to put effort into this if you fail here you can end up losing money, however, the seller provides you few examples.

Requires creativity.

Time:

The set-up may depend on how creative you are. The hardest part will be waiting for sales to happen.

The investment will vary depending on few things. A minimum of 30\$ I would say. However, if things

fail you may end up losing more than the initial investment.

Affiliate Marketing Method#2

How much investment does it require?

Minimum of 0\$ is required.

Description:

Requires finding a niche.

Requires creativity and a bit of marketing - however, the seller provides you few examples.

Requires time.

Time

Depending on your niche and luck this can take up to few hours to set-up. If everything is going well you're going to see money in few days/weeks.

Affiliate Marketing Method#3

How much investment does it require?

Minimum of -random- is required.

Description:

Requires finding a product.

Requires analyzation and creativity.

Time

Takes few hours to set-up.

The investment is based on some free coupons, however, if they expire you'll have to use the money. Also based on other factors, an investment of 25\$ at least I might say is needed.

AdSense Exploit Method

How much investment does it require?

Minimum of 100\$ is required.

Description:

Not completely safe, you still risk your AdSense account. However, he provides you some advices on how to keep it - under control.

Requires creativity/time.

Time

May take up to few hours to set-up.

Personal review:

About the product:

Spoiler ([Click to View](#))

5/10

-Methods are good for people that are new to dropshipping, CPA, affiliate marketing due to in-depth guide on how to get going, in rest depends on your: creativity, determination, time, work you're going to put in if you succeed or not.

-You may want to keep his contacts close, if you're new to this 100% you're going to ask for further support due to outdated pictures and some misleading information.

-Methods are not autopilot, you have to constantly be looking, updating, analyzing and brainstorming for new niches, products, etc etc. Unless you want a small income.

-Not unique and not risk-free, methods are well known, some are years old.

-Work, time and creativity are required.

-Most methods require proper research before starting or setting-up.

About the seller:

Spoiler ([Click to View](#))

5/10

The seller is not shy with his products, he offers what he says in his main post, but:1.The ebook has moments that makes the reader go "hmm?" or ends abruptly and leaves the reader asking "where do I go now?".

2.He encrypted the files with a password, and the main pdf has all pages watermarked with your personal data, which makes the reading harder and almost feels like a passive threat.

3.Some platforms he presents in ebook have changed their system and the designs long ago and doesn't fit with his pictures from ebook, which makes it harder to understand that subject(pictures are outdated).

4.While reading the ebook, the seller makes me feel like he tries to re-sell his methods even though I just bought his ebook.Sometimes talks too much about the benefits instead of going directly to the point.

5.Related to the previous point, the ebook has 130 pages, he could've definitely made it smaller.Some points are way too elaborate.

6.In the main post, he says he's selling only [50 copies](#). He passed that number months ago. (not important, just pointing it out)

7.In 105 pages, vouchers with proofs are very few, and 98% of the vouches that he advertises with are not from his current product that's on sale.

8.The most important, and the reason he got a 5.In the thread there are few questions that hit right on the spot - the seller doesn't 'evade' them as he should, he deliberately says "no, it's not that, has nothing to do with that" which deceives the buyers (I won't post screenshots or I'll give up his methods).

This grade reviews his way of advertising, addressing to potential customers, his behavior and his way of convincing them and the connection between him and his ebook.

Nonetheless, despite what has been said(and few more things that I did NOT point out, intentionally, so I won't make accusations without having a solid base), he gives some good tips and explains thoroughly, 20\$ is a very fair price for what the seller has to offer.

just to make sure my definition of dropshipping is correct and I am not the one making a mistake.

the definition of dropshipping:

"Dropshipping is a retail fulfillment method where a store doesn't keep the products it sells in stock. Instead, when a store sells a product, it purchases the item from a third party and has it shipped directly to the customer. As a result, the merchant never sees or handles the product."

^ that's basically the method. You have to go on marketplace X, post it on Ebay and when someone orders it from Ebay you buy it from Marketplace X with customer's address.

This is forbidden?

Yes, dropshipping isn't allowed. Even though quite a few of the best selling methods around here are just that.

On topic, very detailed review OP!

What exactly is garbage here? I can not understand people like you, you're running around saying how eBooks are shit, then someone actually takes their time to write a review, and you're yet again here saying the same shit. What the fuck is wrong with you? Get off your high horse and fuck off for good, user made a review, appreciate his time spent doing it instead of blabbing your own bullshit. I have absolutely nothing to be ashamed of here and he said absolutely nothing offensive about me or my product, he reviewed it and posted HIS opinion. Do you see OP saying "garbage" or "bullshit"? No, then dont do it yourself either because you're nothing but a peasant that spends his time doing what you just did. Imma stay away from this thread, not because I'm running away, I have nothing to run away from other than say once again that I do appreciate his time and opinion but I'm not going to argue with Lounge whores.

I just got here through your Review Service thread, and I must say I really like these honest reviews. Do you buy these products yourself? Also, do you plan on reviewing software/tools sold on HF as well?

There's one thing from your thread I personally disagree with here:

Code the main pdf has all pages watermarked with your personal data, which makes the reading harder and almost feels like a passive threat. While I understand that seeing your personal information on every single page of an ebook can feel very weird and even threatening, this watermark clearly has a purpose: it prevents people from easily leaking these ebooks onto different sites.

And I still have quite a few products in my folder waiting to be 'stripped'.

Tomorrow my next review should be released.

Quote: Also, do you plan on reviewing software/tools sold on HF as well? Those are usually pretty straightforward, 'you get what they offer' type of thing. Will most definitely give it a try in the near future and see how it goes.

Security-wise? most definitely.

but

Customer-wise? it's a no go. I found it excruciating to read it like this and also the password-input all the time. Decrypt that instantly.

If you've put your eyes on a product and you don't know if it's worth buying, please let me know on [Review Request](#) topic. The more requests the respective product has the higher the chances to see a review about it.

I liked Sonex methods to some extent, right at this time some methods are old and known quite well but if you are creative and put some work and don't copy-paste, and don't expect 100k overnight you can earn with it...

Deal - February 7, 2019, 3:32 am

I remember being a part of the old official reviewers group.

Back then there was lots of nice e-Books, but since it was taken down sellers began selling public methods.

I'm not implying that public methods wasn't at all sold back then, but two random reviewers would be selected to review each book so the reviews would often be objective.

The problem we see now is that some e-Book sellers have their friends review a product. And even if the author has a stranger reviewing the e-Book, the person will feel obliged to leave a nice review as some kind of thanks for the gesture.
