Thread: [MailPredator 2.0 \[Email Bomber/Mass emailer\]\[Inbox\]\[Spoof\]\[Customizable\]](#)

IMAGINARY666 - May 7, 2017, 11:07 am

The complete revamp of one of my older and abandoned applications, MailPredator is a simple and efficient mass emailing tool.

Features:

- [*]Detailed settings for the message body like HTML, Reply-to address, spoofing and all that stuff
- [*]Detailed settings for the SMTP connection
- [*]Detailed settings for the sending system
- [*]Email scraper
- [*]Most emails to inbox (from my tests 100% to inbox)
- [*]Option to play a sound when job is finished
- [*]And others...

Important notice:

- [*]You can spoof the email, but sometimes you will get your email moved to spam if you use things like verify@paypal.com... Sometimes it does work, sometimes it doesn't.
- [*]Delay and timeout are tricky, play with them with caution, if you put wrong values the emails won't go, the defaults I inserted are good

Download link from my website: <http://adrenalinetech.xyz/downloads/MailPredator/>

I can assure that the app is clean, if you have any doubts run it in your VM, I don't care.

VT Scan so you don't pee your pants:

<https://virustotal.com/en/file/2c5bfa77763d7638c64a13233ce4f373214cdb6fab620d176c98909e9796ba06/analysis/1494236337/>

ShadowCoder - May 7, 2017, 12:54 pm

Thanks for the share. I will test that .

IMAGINARY666 - May 8, 2017, 12:05 am

I will work for the spoofer, I think I can get something good... So you don't have to pay for Neos' bullcrap that does literally the same and it costs 30 bucks.

Fixed. Now spoofing works exactly like in Neos' emailer... The only difference between mine and his is that mine is free. :\

Phantom Aboki - May 8, 2017, 6:19 pm

OP thanks for this nice tool.

However, is there no way to add the target emails in BCC?

IMAGINARY666 - May 9, 2017, 12:24 am

(May 8, 2017 06:19 PM)Phantom Aboki Wrote: [\[CITE\]](#) OP thanks for this nice tool.

However, is there no way to add the target emails in BCC?

Will be worked on and fixed in the next release. Thanks for the heads-up.

(May 8, 2017 06:19 PM)Phantom Aboki Wrote: [\[CITE\]](#) OP thanks for this nice tool.

However, is there no way to add the target emails in BCC?

2.0.2 is out... Bcc support added, mail priority support added. Enjoy.

Hopsin - May 9, 2017, 4:40 am

Works for gmail and hotmail ? Thanks in advance, Have a nice day mate! ?

Signature ~ Best regards, Hopsin.

IMAGINARY666 - May 9, 2017, 5:17 am

Signature ~ Best regards, Hopsin.

Check the Presets box. It has a lot of SMTPs preconfigured, GMail and Hotmail included... If you have a SMTP that's not listed there you can manually insert it (host, port, ssl (yes/no), username, password)

swagwaffle - May 9, 2017, 1:26 pm

interesting but wouldn't i need multiple gmail accounts? Don't i need proxies as well? or does this program handle everything?

IMAGINARY666 - May 10, 2017, 12:30 am

(May 9, 2017 01:26 PM)swagwaffle Wrote: [\[CITE\]](#) interesting but wouldn't i need multiple gmail accounts? Don't i need proxies as well? or does this program handle everything?

It's not limited to gmail. You can use any SMTP out there... As for proxies, that's a good idea, I will try to implement it but until then use a VPN..

I've been thinking about this multiple account thing, to load a list like user:pass@smtp but the problem comes when your SMTPs use different ports, you would need user:pass@smtp:port to get it to work...

I also know that you guys are hunting for SMTPs so if someone can get me an output file example from a SMTP scanner I will try to get something working.

EDIT: It works without inserting the port so expect something big in the new release.

New version up, major changes!

Added the option to select SMTP lists. The format is: user:pass@smtp:port

Added an option for random Body, Subject, Spoof if you need bombing and only that

Fixed timeout

Added error log which tracks SMTP errors.

Download link is the same as in OP.

Bastrile - May 12, 2017, 11:45 pm

many thanks for your work, I will test it out

yusufmalikul - May 13, 2017, 6:15 am

Keep the good work, buddy :)

nullassembly - May 13, 2017, 9:02 am

I bet none of you ever checked the VT Scan.

<https://www.virustotal.com/en/file/60c073757c35ed5711747b966528b0ff7759a53a2757b4406dbba51fa7d48454/analysis/1494691176/>

WARNING: 10/59 detections.

Be careful with the file!

Be careful with the file!

It's obfuscated man, I tried to protect the code.

IMAGINARY666 - May 13, 2017, 2:42 pm

(May 13, 2017 02:27 PM)Polatic Wrote: [\[CITE\]](#) I do respect your work, but you know you dont want to be infected ofc.

I mean read your own signature you know

I think youre clean tho, all your previous projects are also like coding and still not banned if it was malware (first post in 2014)

Yeah...

And the golden rule of hackforums or any forum like it is to use the files inside a VM or at your own risk. I can give you my word the program is safe, but can't do anything more than that.

Cyb3rNuX - May 22, 2017, 5:11 pm

good looking design, yet doesn't work for me, mails fail to send even when i added smtp port and hostname and login is ok

IMAGINARY666 - May 22, 2017, 10:14 pm

(May 22, 2017 05:11 PM)Cyb3rNuX Wrote: [\[CITE\]](#) good looking design, yet doesn't work for me, mails fail to send even when i added smtp port and hostname and login is ok

The format should be like this:

Example:

johnnygoodboy:eatapples123@smtp.gmail.com:587

It doesn't support smtps with IP format yet. I will fix it in the next release.

Bastrile - July 3, 2017, 10:11 pm

hi, download link is down? can you please send me a new link for latest version?

many thanks in advance

keemodas - July 4, 2017, 8:09 am

I have downloaded it but i don t how to use it.Anyone to help out.

skype:hawn.williams

Sir Piffalot - July 4, 2017, 8:17 am

dude this is awesome thanks for sharing it with the community I will try it out

Unedent - July 5, 2017, 3:44 am

He doesn't work for me.. Error 000x00

D4nm0 - July 5, 2017, 4:27 am

Hello, the link died possible to put another?

IMAGINARY666 - July 7, 2017, 3:14 am

The project is closed.....

manixx - July 10, 2017, 5:59 pm

Hello friend, the toolz isnt on the download page.. Please can you upload link again?? Thanks

Sorry I dont see your past post... Too bad I came late.. Cheers

Dude it would be real cool if you can create another email mass sender.. A guy like me could really use one... I would also like to chat with you in private but being a "peasant", it seems I cant lol

ibo45 - July 12, 2017, 12:04 pm

cela marque Error 404 - Page Not Found

testoresto - July 14, 2017, 1:36 pm

If you have time...

please mail me this tool to

karenlewis550 (at) gmail {dot} com

Thank you very much

BinaryFox - July 16, 2017, 1:49 am

thanks for share guy ! i need your exctractor

hctor212 - July 28, 2017, 2:49 pm

great tool bro plz mail to megauj (at) gmail {dot} com appreciate ur effort!

PHDR - July 29, 2017, 4:46 am

do you provide SMS spoofing tool as well ?

KapitanZvezda - August 3, 2017, 6:07 am

I'll test and reply later. Seems legit so far.

jumper191112 - August 4, 2017, 1:01 am

Nice very Nice tool it works perfect.

faxxgrid - August 24, 2017, 7:18 pm

Please can I get this tool. Thank you.

dodouble - August 25, 2017, 7:06 am

how can i get this tool? tanx in advance for share

killsignal101 - August 25, 2017, 12:02 pm

hey can i get a copy of this?

skype101 - August 25, 2017, 8:02 pm

Download link not found bro, how can we get a download link.... Thanks in advance

bogieman - August 25, 2017, 11:51 pm

yeah same here with download link :(

But looks a great tool :)

IMAGINARY666 - August 26, 2017, 5:12 am

It's no longer maintained.

IMAGINARY666 - August 26, 2017, 5:12 am

It's no longer maintained.

faxxgrid - September 3, 2017, 10:12 am

Hey Imaginary,

Do you know where I can get sms caster???

Thank you in advance

terrykevey - September 21, 2017, 9:23 am

This ass hole was scammer,the software has backdoor target at your btc
