I'm wondering who here generates their income or a part of it from GreyHat/BlackHat methods (unethical or flat out illegal). You don't have to mention what the method your doing is as this thread would be closed instantly. Just curious as to how many other BlackHats or GreyHats their are out there

Lol no one (no one smart, at least) will admit they're a black hat on a public forum

OP is the worst undercover we've had on here for a while.
