(May 8, 2017 10:04 AM)Cyber Coder Wrote: [\[CITE\]](#) i sent 0.2 eth as test on liqui 10 mins ago and they are not showing on balance hmm

I just got the following response from two different support teams, Bittrex and Liqui.

"Currently the ETH wallet is processing deposits and withdrawals slowly. We are aware of the issue and are working on a solution that will bring ETH deposits and withdrawals back to crediting within the normal time frame. Please allow extra time for your deposit to confirm while we work through this issue.

Please make sure that you have deposited greater than .1 ETH to your address as this is the minimum requirement for an ETH deposit. If you have not deposited greater than .1 ETH please send more to the address and the coins will credit when the balance of the address is above .1 ETH.

If your issue was not with a delayed deposit or withdrawal please respond here and I can help you further.

Thank you,"

More or less the same responses, but i've had an issue with the last 4 ETH withdrawals/Deposits. All have taken over an hour to show up even as pending.

I am just going to say that it's going to go back to \$1.10 and then people should start investing a lot into it.

With the VISA being removed from the site and whitepaper, a lot of people lost trust in TKN. People are not pleased with this and we might see a drop in price in the next few days.

It happened two days ago and it had already created the FUD which along with BTC price had made TKN to trade in a low price. IMO, even without using VISA in their ICO they would had the same success. Fingers crossed for the September 500 MVP token card release, and i'm expecting lot of videos circulating the review and usage of it :)

Pretty sure that people keep hammering on the visa logo, to get the prices even lower. The team has to get a clear explanation out, to stop it.

Nobody knows.

But at least you didn't buy it yesterday like most others.

RushB - May 9, 2017, 1:42 pm

Yes, they would have gotten the same results in ICO. I was in the ICO but sold after, looks like I made a good choice.

Not sure where to buy back in, if so. I am waiting to see how the team clears things out. Their communication was awful after the ICO. For three days they did not say a thing.

Still haven't bought in. Waiting to see what happens in the next week or so.
