Grizzlies - May 8, 2017, 10:36 am

Bought 2000 TKN coins, bought it I bet Liqui. Bought it for: 0.00063271

<https://coinmarketcap.com/assets/tokencard/#charts>

It's now on bittrix: <https://bittrex.com/Market/Index?MarketName=BTC-TKN>

Transferring it to bittrix as of now. Can't wait till Poloniex picks it up. Might shoot up big, be prepared ?

Exchanging 1000\$ to BTC right now to deposit on Bittrex and buy these Tokencards ?

The great thing is many people don't even know it is already live. A lot of people missed out the ICO and want to invest when it is live anyway. Bittrex is not even added on coinmarketcap yet.

Once people notice the coin is live (trade able on difference exchanges) they start investing. Even beside the bug that has been found earlier the coin will rise I think. I am very optimistic about this project.

Lets see where this goes.

Patient is my best friend, that's what makes my profits getting bigger and bigger ?

EDIT: This is most likley the reason why the price is currently dropping

A trade bug, or Bittrex way to steal our money, i don't know and i don't care as long the price goes up, and it will.

Yea every crypto currency exchange site have their way to "steal" a shitload of money from us. But if you invested then hold long and you will get some nasty profits. ?

I repeat, this project is going nowhere. Told it 2 days ago in this thread, and will tell it today. Look at the price crashing quickly. Project will end.

Based on the fact that my investing group talk with the dev weekly.

And I can tell you that they token will not be added on Poloniex on the short term. It will be added in September. Now Bittrex is the "largest" exchange that they will keep.

Mark my words, see you in September.

How is it going nowhere if it be added to Poloniex in September? Seems like a contradiction in terms to me mate?

Breakout on bittrex. Visa is back on the website from what I have seen.

Tomorrow night, do not know the exact time, the devs will do an AMA.

Visa gone again from the website ?

Failing project based on what. Those smart people who sold under ICO.

The price will not move until september, just a quick look in the whitepaper could have cleared that.

Yoshi - May 16, 2017, 8:41 am

Luckily I only put \$100 in @ \$1.06

I will be holding till atleast september if the price doesn't increase earlier. Lets hope for the best.

I invested 1 BTC and i feel like it would turn into 1 ETH :D

Haha yea lucky you xD I put 1k into this and currently im -500 bucks but i won't sale until something happens, one day someone will pump the price up and then we can sell if we want to, but for now everyone should hold and wait, especially after the huge XRP rise. TokenCard coin just got released on Bittrex, when it gets added on Poloniex then we will hopefully see a nice rise ?

I still do have a little faith on this project, let's hope they don't screw us.

Adoc - May 16, 2017, 10:39 am

TokenCard is not going anywhere until atleast september/october so if you are thinking to get out of that -\$500 soon, forget about it and accept your lose.

Project is going nowhere, it is a complete failure. Can assure you that. You will see it,

Mark my words.

Can you please explain your contradiction? You say it's going knowhere but that it isn't going anywhere until September/October?

Black Blade - May 16, 2017, 11:05 am

I also marked your words when you said TKN will reach easy 5\$ once it hit exchanges ?

I will see you in September ;)
