Thread: [MyBB,XenForo,vBulletin Or IP Board for a Community, Gonna add New Features eventually](#)

Nyctophiliac - May 8, 2017, 11:55 am

Wanna build a Community Board where people can talk about Various things.

And then I am gonna add new Features eventually, What should I use for such a project ?

MyBB, XenForo, vBulletin Or IP Board ?

Sjas - May 12, 2017, 4:36 pm

VB isn't safe. I'd probably go with either Xenforo or IP.

P???ce - May 13, 2017, 9:42 am

I don't like vBulletin after 3.8x versions, iP board, never!
I'll suggest either consider MyBB or XenForo.

Nyctophiliac - May 13, 2017, 11:25 am

I've made my choice and have went with XenForo

Thanks for the suggestions

Good choice.

If you need add-on recommendations or any help at all with xenForo, let me know.

I am looking for a way to Implement a Reputation System, Similar to that of MyBB. But I don't know what to use.

OObtain - May 14, 2017, 6:20 am

MyBB is what I am using for my current forum.

Nyctophiliac - May 14, 2017, 6:27 am

I didn't go with MyBB because It didn't have the things that I needed.

If it had, Its the best forum software and I would've definitely gone with that.

Whats your forum link btw ?

Ogobtain .com

(They wont let me put full link but go ahead and sign up!

There are several. I'm linking the ones that are kept updated for the latest xF version :

<https://xenforo.com/community/resources/th-user-ratings.4647/>
<https://xenforo.com/community/resources/post-ratings-taking-likes-to-the-next-level.410/>

The second one is a bit more advanced.

Banadmin - May 14, 2017, 2:16 pm

Has to be MyBB for me. I've had my fair share of using all of these and MyBB is by far the simplest, it's free and you have the potential to make a really premium feeling site with it.

Nyctophiliac - May 15, 2017, 10:25 am

I love MyBB very much, But it simply doesn't have the things that I need for this community.

Banadmin - May 16, 2017, 12:37 am

Could've added a poll to your thread? Not sure if you still can or not.

Nyctophiliac - May 16, 2017, 8:03 am

What do you mean poll ? A Poll for selecting MyBB or XenForo ?

Yes I might do that.

But the only reason I didn't select MyBB was because of some things that are not possible in it.
