Thread: [Anyone here with \\$5k profits want to purchase a HF Crypto Currency group?](#)

Skidy - May 9, 2017, 6:12 am

Surely someone here has \$5k they can chuck into creating a Crypto Currency group. Would be pretty cool. (Not sure if its allowed but) Pay for entry into the group (along side having something to offer) which would allow you access to your sub-forum, inside the private sub-forum you could all post "inside" hints/tips/pumps etc.. (you could earn back that \$5k quickly I recon).

On the other hand, that's probably what this part of the forum is for. Just an idea.

?

Spoiler ([Click to View](#)) Someone should suggesting to Omni to allow resizing images inside the code. E.g.: `[img height=100 width=100][img]`

I've made 5K in profits but HF groups aren't worth the money.

Some groups have spoke about having a crypto section within the group.

I think it would be a good idea. Try speaking to a few group owners and see if they will sell a sub forum.

I am good, thanks. I am doing fine so far with my own research!

That would be the best userbar ever

I'm pretty sure DevNet has purchased a group and is going to base it around Cryptocurrencies.

DevNet:

1 group solely dedicated for cryptos already present.

(Genesis)

2 Groups have sub sections got crypto. Illuminati and TBH

I wouldn't buy a group for 5k (maybe like \$500).
