Thread: [Review Offering](#)

Mr. Reviewer - May 9, 2017, 9:23 am

[Click Here To PM Me](#) I've started making reviews about products due to the huge amount of unworking Ebooks, many containing fake vouches and fake proofs.

It doesn't mean I'm reviewing or reviewed only bad products. That remains the decision of the person who reads it.

Since some people like my unbiased reviews, few contacted me to review their product, however, I want to make a difference, meaning offerings will be made publicly. If you have a product you want me to review be sure you read the rules CAREFULLY AND UNDERSTAND THEM.

For who is this service?

-People who want more exposure of their product. I can promise you'll have more engagement in your sales thread with this.

-People who are very confident in their product. Who want a proper review to be made that includes every possible detail inside your sales thread and outside it!

And the most important, it is free!

What do I do?

- Unbiased review of the product.
- We review from a neutral perspective.
- Everything will be analyzed on your thread, from vouches to pictures and methods.

TOS:

RULES

You must accept the fact that my Review will probably obliterate your business or mutilate your persona. Make your business raise..or break it - this is especially the case with people that are new to the Marketplace and don't have much trust built around. I will be unbiased and as neutral as possible.

If you decide to hand me the product it doesn't mean we are buddies and most definitely it doesn't mean I'll make a positive reference.

The process will be:

You give the product.

I'll make a review.

Simple as that.

Once the Review is released, you are forbidden to contact me about the state of the Review, if you don't like the writing, or I said 3 instead of 2 fake-vouchers, or I put you in a bad light: I will simply ignore your messages. Unless there is something definitely wrong I won't recheck my analysis.

Everything will be done ONLY through PMS, NOT SKYPE , NOT EMAIL. Do I need your help? I'll contact you through PMS.

The download link will be set on <http://www.mediafire.com> or <http://www.mega.nz> , you may want

to make an account.

If there is anything else I have to know about your method that your PDF doesn't cover, make a text as detailed as possible and send a pm.

My Review can take anywhere from 1day to 1month. Depending on your methods and my free-time.

Blackhat methods have a higher-priority than whitehat methods. Because: Usually, they are sold in limited copies.

Most are pretty straightforward and easy to review.

Once you send me the product, you'll make a post here saying "I have sent my product for reviewing" or something between these lines. Very important. We don't want anyone to misunderstand a review and say it's been given under the hand for positive reference and such.

Products I don't review: -Services(Social Media increase, CS:GO Boost, Programming lessons, Homework services, Telephone Verifications, Betting groups, Investing groups)

-Ewhore methods(unless it's just a bonus from a product or comes at package with other different methods that are inside your product).

-Giveaway or free products.

PM needs to contain: A download link with your product (read point 5).

The Thread where you sell your product.

Anything else I need to know about your products? Make a nice detailed text and send it on PM. (see point 6)

I will review everything, from vouches to proofs and people to methods and complaints that thread has. Don't try to make an excuse about it and say you did not know that voucher has -this and that- or why the proofs are fake and such. If they are in the thread they are taken into consideration.

Very good question.It's very debatable.

If it's followers/subscribers type of service, then definitely not. Unfortunately, there is nothing to review here.Gonna add a section in my post talking about this.

On Softwares such as keyloggers, I can see myself testing it out and try on my friends and stuff .. can talk about the design and how much effort does it require to get it going and whatnot. However very debatable, will think about this, if you have any questions about any product you're offering please give me the thread to see what you're selling so I can provide a legitimate answer.

It wouldn't be keyloggers and shit like that. Programs like proxy scrapers and sms bombers etc. Some are good, some are bad. I feel like a legit review of those products would be better. I have a friend that is selling a bomber I sold him. I wrote a help doc for it but I think a legit review of the product rather than a vouch would be better for him. Even if its against the bomber itself.

A bit unfamiliar with the Proxy Scraper subject, not really into cracking and stuff, but I can most definitely give it a try. Sms Bomber no problem.

Why not keyloggers? They are no different from reviewing a proxy scraper etc.

I'm not for infecting people. Might seem kinda dumb but I just don't believe its right. So I try to stay away from the subject all together.

Mhm just because it is possible to infect others doesn't mean that it is the purpose. Not all RAT / Keylogger users uses it for malicious usage.

I understand that. I just personally believe that peoples intentions are always pure. Thats the only reason why I don't associate with projects like that.

BTW: someone should fund MR reviewer to randomly spot check the ebooks in marketplace. These community efforts help to keep our forum safer, since staff won't do anything. We good people can pool together a fund to support his work! What does everyone think?
