GUI needs a lot of work (if you ask me). Overall, seems helpful. Thanks for your contribution buddy and have a nice day ?

Signature ~ Best regards, Hopsin.

Pro tip: I'd use a better file host than FileDropper since they discontinue the download link after 60 days of inactivity. You may want to upload to mega or mediafire, etc.

Nice buddy, but hey, good interface never hurt anyone, right? :P It really depends from the developer. I know its nothing important but still, some people like it.

Hey Man, If you cant do the job can you please refund me my \$65.

You have ignored all my messages for the past week, if you have legit reasons please explain why I dont mind if you have delays etc.

But thats no reason to completely ignore me.

A small bit of customer service would not go a miss

I dont hate you. Its just really bad idea to hardcode the passwords. Why release something you spend 5 minutes on? Put some effort in it an surely it will be appreciated even more.

Noone is whining you lil weeb. Tool just reached end of life.

RFLXY4 - May 18, 2017, 2:31 am

Too bad someone changed all the passwords so it doesn't work anymore. Could just edit the code to make people able to put in their own email accounts?
