Thread: [\[PUBG\] WTB Private PUBG Cheat \(ESP/Aimbot/Etc.\)](#)

Forte - May 9, 2017, 9:03 pm

Hello all,

I'm interested in purchasing a PRIVATE Playerunknown's Battlegrounds cheat which must first and foremost must be UNDETECTED by BattleEye. Proof of your ownership of the hack must be provided as well as proof of it being undetected. On top of this you MUST have some form of reputation on this website in order for me to consider purchasing.

MONEY IS NOT A PROBLEM.

Features i'm looking for include:

VISUALS:

- Names ESP
- Distance ESP
- Box ESP
- Snapline ESP
- Health ESP
- Bone ESP
- Player ESP View Distance Slider
- Custom Visible Color
- Custom Hidden Color

WORLD:

- Item ESP
- Vehicle ESP
- World ESP View Distance Slider

AIMBOT:

- Aim at Enemy Players
- Custom FOV Slider
- Custom Aim key
- Remove Spread
- Remove Recoil
- Remove Weapon Sway
- Instant Hit

Not all of the features listed here are necessary, I can live with just the basics for Removing Spread, Recoil, Sway, and Instant hit as well as an aimbot, and player/item ESP.

If you have something close to what was described here, PM me and we will discuss what will happen next.

SCAMMERS BEWARE. IT WILL NOT WORK.

fuck. wrong sub.
