Thread: [Want to learn shell-scripting](#)

**yungchrist** - May 10, 2017, 3:49 pm

Do you guys have any good books or resources? Thanks in advance! ??

**Pillus** - May 12, 2017, 4:28 am

I find this the best for BASH:

<http://mywiki.woledge.org/BashGuide>

It covers both the super basic, the basic, the medium and advanced topics, with examples and descriptions.

If you ever come to a point where you don't know what to use for your purpose, you can use this overview for that:

<http://www.gnu.org/software/bash/manual/bashref.html#Introduction>

**Sotirod** - May 12, 2017, 6:24 am

I'll vouch for BashGuide. I use it quite a bit when figuring out shell stuff.

Another thing... Sounds pretty basic, and "duh", but get a linux distro running, and go through man pages.

Go here and download this great intro to the command line and shell scripting.
