This picture really explains it.

There will be a video of my reaction. I will not publically post however. But if you want to see. Add me: superspyxt@hackforums.net

But w/e. ITS SO AMAZING, As a matter of fact, I got it, just 2 hours ago. Again, i was suprised so i didn't know ANYTHING. I know my mom got a iPhone too! But then my sister had a gift for me. I thought it was clothes.

Anyways, its a 32GB! Mom thought 8GB wasn't enough (Do not argue.)

It was only like \$100 something because its a AT&T Upgrade :D

You should not. It sucks and i heard there was some atenna problem.

You should wait.

EDIT: It's white.

W00MBA - July 25, 2010, 6:31 pm

Yea i have a white one as well. If you are looking for a case, check out the ifrogz luxe case on Amazon. It's the exact same 2 part shell case that they sell in the AT&T store for \$30, but amazon has it for \$4.

About the iphone 4, that would be the reason i wait. I think it might be over publicized because i know plenty of people that have it and dont have the problem. I'll keep an eye out on Apple to see if

they leak any plans to release a new model :)

Zyx - *July 25, 2010, 6:44 pm*
