Thread: [\[Monitor\] What monitor to choose?](#)

Daddy???????????? - May 11, 2017, 7:34 pm

I am looking for a 4k monitor that's 24 to 27 inches, also a 1440p monitor that's 24 to 27 inches.

Any recommendations would be nice, thank you.

Do you mind ultra-wide?

Will it be used for gaming?

Yes, it will be used for gaming/workstation/etc.

What is the main purpose? Do you want to use it for Gaming? As you mentioned 4K 24 to 27 inches, I am assuming that you want to use it mainly for gaming. There are so many gaming monitors available with different specification. To me these two could be good options for you
