Thread: [Computer lags in video games, but fps is fine.](#)

Shoppa - May 12, 2017, 7:11 am

Anyone has any idea what it could be?

My rig:

Windows 10 64bit

8GB ram

GTX 970

Intel core i5 -3350P

G750M Cooler Master power supply

My graphic card driver updates are up to date

5chn4pp - May 12, 2017, 11:01 am

Download [fixlist.txt](#) file and save it to the Desktop.

NOTE. It's important that both files, FRST/FRST64 and fixlist.txt are in the same location or the fix will not work.

NOTICE: This script was written specifically for this user, for use on that particular machine. Running this on another machine may cause damage to your operating system

Run FRST/FRST64 and press the Fix button just once and wait.

If for some reason the tool needs a restart, please make sure you let the system restart normally. After that let the tool complete its run.

When finished FRST will generate a log on the Desktop (Fixlog.txt). Please post it to your reply.

Should take 1 - 10 minutes at most, if it takes longer then something is really wrong.

Maybe my virusscanner is blocking it or something?

With make sure the text files are at the same location you mean just put them all in my desktop right?

When I launched Farbar recovery scan tool all i did was press fixing, did i need to do anything else?

When I launched Farbar recovery scan tool all i did was press fixing, did i need to do anything else? Comodo shouldn't block it, but if you want to be sure you can try disabling it.

Yes, all logs and the frst tool on the desktop, that would be correct.

How long has it been? FRST usually shows in its corner what it is doing, you can try posting a picture of it so I can see.

<https://i.imgbox.com/pjz9ZWIO.png>

here is a screenshot, blanked the rest out of my desktop cause its full with games and would take you a while to find the text files.

In the corner it says from dutch to english: Busy with fixing, please wait.

Btw all my games are downloaded through steam, I never torrent anything, in case you think i may be heavy infected with that

I would say just wait, also FRST lists all steam games with "steamapp" so that's not the problem.

Actually i just realized i didnt run it as admin, could that be the issue?

Its still fixing
