Thread: [MD5 Hash Facebook](#)

eblis - July 23, 2010, 4:08 pm

Can anyone tell me how to get the MD5 hash for facebook accounts?

Hide_My_Ass - July 23, 2010, 4:11 pm

What the fuck are you talking about? DO you have one you want me to decrypt ?

~Tom~ - July 23, 2010, 4:13 pm

If it's possible it's extremely difficult. I remember The Inj3ct0r Team managed to hack the Facebook servers.

And also, how is this a hacking tutorial?

I'm not too sure if you can or if it is a correct MD5 hash. I have a large database or RT's and i'm unable to decrypt so please feel free to have a go 69f45b4a39211ba9e89857211cba1d8b.

Sorry have a posted this in the wrong section ???

I was hoping someone could talk me through it as I'm still learning the basics.

supapig - July 24, 2010, 2:08 pm

i think it's not possible :X

i think it's not possible :X

giprabu - January 12, 2011, 8:27 pm

its not totally impossible.. did anyone try rainbow tables ..?

@eblis : i'll try decrypting that hash.

lars90 - July 22, 2011, 4:39 am

what are you all talking about of corse its possilbe you just have to hack in to the DB of facebook esay sead eays done ^^

dangercrow - July 22, 2011, 5:29 am

Surely if it was that easy, loads of people would have done it by now?

And there would have been many-an-uproar about Facebook being insecure?

Cruzer250 - August 22, 2011, 9:25 am

try BarsWF_SSE2_x64. its the fastest one I found that actually works for cracking md5
