Thread: [GamesVerge - Gaming Community, Looking for Moderators - Not yet finished](#)

Nyctophilic - May 13, 2017, 11:33 am

[VISIT BY CLICKING HERE Or Going to gamesverge.com](#)

I am creating a New Forum.

Its called GamesVerge and Its for talking about all kind of things about Video games. Plan to add many more sections If we gain popularity. Thats a speculation though.

Its is powered by XenForo and a lot of plugins.

It currently has only 1 forum and its only for Testing purposes.

Permissions are not yet set currently and Registrations are not allowed.

I am also looking for suggestions on the theme colors.

I think they are too bright and may hurt the eyes after sometime.

But I cannot think of any good Color Combinations, Any suggestions are welcome.

Good day.

EscortPay - May 13, 2017, 8:31 pm

Nice one . I would like to go for a mod position . Please kindly PM me with your skype or more information .

test - May 13, 2017, 8:33 pm

That theme hurt my eye holes. Go for something a bit darker and easier on the eyes. Good luck with your project anywho.

Malevolent - May 13, 2017, 11:32 pm

The name isn't too bad, but the site looks like shit to be honest.
You have a lot of work to do.

Formal - May 13, 2017, 11:41 pm

where is the sign up button smh. and I like it so far, it obviously needs more work on it but its gonna turn out great?

HighTier - May 13, 2017, 11:43 pm

I do not like the colors and it looks kind of basic. Other than that it looks good.

I am going to implement 2 Modes of the theme

Dark and Light

I think the Light one looks okay for Now, I will add the Dark one in the near future and If I think it looks better, I will replace it with the light one.

Other than that it looks good.

I updated the colors to be more eye friendly,

What do you mean by basic ?

How can it be improved ?

I am looking for suggestions, Any are welcome.

I made 4 Modes for the theme

Red,Green,Blue,Purple

Blue being the friendliest to the eyes.

Green being the default and Also being pretty friendly.

Purple and Red need some tweaks.

I cant wait till it is!

I cant wait till I hit 50 post so I can advertise my site.

LemonTea - May 18, 2017, 12:39 am

when i made my first forum a while back i also ripped se communities theme lmao

Banadmin - May 18, 2017, 1:46 pm

Looks like you've made the switch to MyBB. Theme isn't as bad anymore. ?

"We cannot process your registration because there has already been 2 new registration(s) from your ip address in the past 24 hours. Please try again later."

I think you have messed up something on the checking.

Minus9 - May 19, 2017, 7:25 am

You should create a little pure userbase before advertising and fix the website. First impressions are crucial. Your site will not survive and it'll die soon.

Kryptonite- - May 19, 2017, 10:17 am

Wont' be joining sense you ripped off #

I was gonna disable Registrations, The Title contains not yet finished Which indicates that its not finished and users should not come to the website yet.

Frizz - May 21, 2017, 7:49 am

Lol the theme is downloaded and not even edited. This is just a really simple downloaded forum, you need to work on your forum if you want to stand out among every other community out there.

Caligeina - May 21, 2017, 3:04 pm

You're using Aoki's (FlatInk's) ripped (possibly released) theme. If you're going to use his theme the least you could do is leave the copyright in the footer.

Nyctophilic - May 21, 2017, 11:36 pm

Ok, Lets just add it haha. I didn't know that theme was Aoki's, My Helper suggested me and I liked it. He removed those Copyrights.I added them back.

Fear - May 22, 2017, 1:36 am

Only thing I can see is that you use nulled theme there is nothing else on your website

Frizz - May 22, 2017, 2:58 am

The theme is downloaded which means that you have not done a single thing for your community(forum) please work on it and change it up a lot, make it stand out among every other community, make it unique. Make it smooth and really efficient to use.

Those are my tips to you, not sure if you'll accept them though.

Thanks for leaving the suggstions,

Of course I am gonna change it a lot, This thread was only for people who wanted to be staff members and I didn't intend anyone to come to the site just yet.

That might be because the website is not finished yet and this thread was for people who wanted to become mods.

OneTwoThree - June 5, 2017, 7:43 pm

Sadly new forums are dead and have always wasted my money.

Caligeina - June 6, 2017, 6:13 pm

Why a premade theme? If you're going to start a forum in an extremely saturated niche you need to be unique.

Edit: Coaxing people into joining for mod position isn't a great strategy, I know from experience (many years ago).

CALIFORNIAN - June 15, 2017, 3:35 pm

This is a painful website to look at. I suggest you work on it a bit more...

Vibe - June 28, 2017, 12:04 pm

Every time I log in I get logged out

Ice. - June 28, 2017, 5:40 pm

Basic Review:

You are using a theme that has been leaked more times than I can think of.

You are using a very hard niche' to grow.

My suggestions:

The best way to grow a gaming community is through video games,

Examples: Use PlayStation communitys, Xbox communitys and steam groups to your advantage.

Create gaming accounts and send out mass messages.

Use Facebook groups to your advantage.

Be unique, add things that make you stand out.

LemonTea - July 27, 2017, 11:27 pm

the site looks very nice...

L33T H4CK - August 1, 2017, 6:04 am

I have checked it out and it is good, but could do a bit of work.

? I would like to be a moderator on this site, plz PM me. ?
