Does anyone know where to get a cheap mechanical mod? I can't seem to find a good mech mod that isn't at least \$80.

like what exact watt mode do you want?

Aqzrk - May 14, 2017, 9:35 am

Mechanical mods usually don't go by regulated mods, so you're not able to adjust wattage.

There aren't good and cheap mechanical mods. Maybe some semi-mechanical. Limitless had a semi-mechanical mod for \$65.

Aliexpress sells some, but don't buy cheap chinese shits

You can get good deals from "vape.deals" <-link
Enjoy buddy ;)

I got my eleaf istick pico on directvapor website. The mod alone is (I believe) 19.99\$ USD. Battery seperate. Do not bother buying the tank + mod package, the eleaf tank SUCKS and leaks everywhere!
