Thread: [Looking for Hootsuite \(like tweetdeck\) Members!](#)

XxVisualsxx - May 13, 2017, 6:03 pm

Im in a hoot right now that does pretty well we sit between 25-30 members right now looking to expand a few spots...

QUICK INFO FOR NOOB:

we all have our accounts linked to the hoot suite app, no password or email or anything will be needed, just when you log in by yourself.

you get two retweets an hour to every account which produces around 15K impressions on a normal tweet to about 1M on my top top tweets.

super easy! its all done with a select all button.

twitter 25K+ with no fake followers!

(its free)

DM me for more information!

Thanks friends.

What's the difference between hootsuite, teams/tweetdeck? I have an 18.8k and I'm interested in this.

i think absolutely nothing... we all just have our accounts linked through the app and you select the tweet you want and RT to all our accounts

I'll probably join if you still want people. :)
