Thread: [what is the best free anti virus/malware?](#)

x_Terminal - May 14, 2017, 1:09 pm

what is the best free anti virus/malware?

Saltpeter - May 14, 2017, 1:11 pm

The included Windows Defender isn't all that bad as long as you don't go to dodgy places.

Mr.Cat - May 14, 2017, 1:13 pm

Actually its best if you have more than 3-4 antiviruses running for maximum protection!

EasyPeasy - May 14, 2017, 1:13 pm

Not the right section, but I dont believe there is any best one, maybe try malwarebytes, keep in mind I'm not a pro in this domain.

ZerFallen - May 14, 2017, 1:14 pm

Malewarebytes is a pretty good antivirus.

Flaws. - May 14, 2017, 1:15 pm

Malewarebytes isnt an antivirus

Kyrus - May 14, 2017, 1:15 pm

All you need is one of these babies and you won't need any anti-virus or anti-malware.

This box connector automatically filters all potential harmful/already harmful data incoming to your computer.

Spoiler ([Click to View](#))jokes aside, go for Kaspersky or Panda and Malwarebytes

Holdstrom - May 14, 2017, 1:16 pm

Is the copper pipe to beat up the bad data?

Kayoz - May 14, 2017, 1:17 pm

So instead of the connector box having to store all those bad data (you would need a lot of data storage), it converts the data particles into electricity and the the copper acts as a ground as it

comes out of the box.

Shortcut - May 14, 2017, 1:20 pm

Would recommend MalwareBytes and BitDefender.
For annoying ad popups, and adware: ADWCleaner

SavageAF - May 14, 2017, 1:21 pm

'data particles' lol, but yeah OP you don't really need anti-virus, just don't be stupid

Ytube - May 14, 2017, 1:22 pm

McAfee is so good, even their CEO talks about it in a good light.

CleanCarrot - May 14, 2017, 1:23 pm

I think the best AV's are Avira free, panda, and AVAST
"iihh avast is so sh*t..." => Not it isn't it's quite good, especially for runtime.

MOKA - June 7, 2017, 7:00 am

Free: Avast & MalwareBytes
Paid: Kaspersky

WhoseLineIsItAnyway - June 8, 2017, 1:49 pm

Windows Defender is pretty good, honestly.

B FOR BADASS - June 8, 2017, 2:36 pm

Hello buddy,

I use mbam. It is very good. I have the premium edition. No hassles ever.

Thanks and have fun.

SiLeNt-AnGeL - June 9, 2017, 12:46 pm

For me I am using Kaspersky antivirus.

Just download the latest version from kaspersky website, you will get it 30 days trial. So before 1 day of trial expire, just reset your trial and all gud. So in that case you are using the kaspersky paid version for ever.

Search for kaspersky trial reset in google, or if you can not find just pm me and I will send you.

Good Luck

Spiked - September 2, 2017, 10:00 pm

Anti-Virus: Windows Defender
Anti-Malware: Malwarebytes
