Its a game called "Hackerexperience" and you basically need to hack things to get better stuff and
you can get slaves and ddos people xd. (ingame)

D?ceived - May 14, 2017, 3:06 pm

Would love to get some bitcoin also as im only just starting this round and also after its sent ill
upgrade my stuff could you upload some stuff to me also

It's cool seeing that people still play HE (Although its kind of the wild west now).

No, I don't need HE btc, just wanted to say that it's cool seeing this.

One problem, the forum doesn't exist anymore :P

Apparently HE should shutdown by the end of the month or so according to the owner.

You should try out slavehack2.com

It's in beta at the moment but it looks promising. Its based off of SH1 which HE is based off on.

I believe that they are simply closing the old forum for a new one, much like they have archived the old HE1 channels on their discord.

HE isn't closing down? Aren't they simply upgrading it to HEBorn- the old system with a few of the upcoming HE2 features?

The game (SlaveHack2) itself is alright, and fun at times- but the management and development team are an utter joke.

There was a bug that stopped people from being able to hack, that they didn't fix for a full day. And simply brushed it off when asked with "so-and-so will have to fix it when they get a chance" The owner also acts like a complete ass towards his community at times and has been found trying to ruin and extort similar games. Didn't they also make bots that spread the website URL throughout HE?

Thats a bit bs...HEborn was supposed to come out but like 4/5 promises/deadlines the owner made have already passed and not a single word on it. Also, SH2 is on beta at the moment and for a time, there was a void in the game as one of the devs had to temporary drop out so it ended up being a one man team. Also, if it sounds like he is ruining other games, its because if you looked at renato and the devs history, they go back. Renato basically shitted in an online discussion on the SH2 dev even though he was asking renato some reasonable questions about some stuff. And for the bots to spread SH2 on HE, it wasn't the devs, it was members of the community who switched over to SH2. How I know? Its been publicly discussed on some of the discords.

Ask some old players from Hackerexperience and many will agree with me about renato, some going back as round 1 in HE.

Edit: Also, good luck on syscrack. Seriously. While I will probably stick to SH2, syscrack seems to have found a fanbase with people from the HE community. Good luck ^_^

Yeah, I'm not disputing that Renato has a terrible track record, especially with release dates. And it's not just HE he tries to ruin, I support an upcoming game of the genre- he essentially bought one of the domains that were going to be used so that he could ask for more money, else he would 'turn it into an "adult" site, or copy the SH2 design onto it' so that it would look like an attempted copy.

Just makes you think, doesn't it :P

I've been there since the start of them too, but we digress from the main discussion of this thread.

If you want to continue our rants towards the bad sides of HE + SH2, just PM me directly :)

Edit: Just saw your edit, thanks for the kind words. The team is pretty good!

Korvo - May 14, 2017, 7:49 pm

Haha, I think we could go on and on but in the end, I think enough talk has been said about this as we've gotten off-topic a bit. But yeah, I know the dev did that. Might be considered jerkish but iirc, someone from syscrack said something negative or something considered flaming against SH2 which is why he retaliated.

To OP, I apologize if it sounded like we got off-topic. In the end, all of these games are related to the same genre though ;)

To everyone else, good luck on this. Seen OP post before about HE before and from the sounds of it, he sounds legit and helpful.

This is my last post on this thread as I think I've said enough.
